23.02 CIVIL PENALTIES. A municipal infraction is punishable by the following civil penalties:

First offense: \$500.00.

Second and subsequent offenses: \$750.00.

(2) Each day that a municipal infraction occurs or is permitted to exist constitutes a separate offense.

(3) Seeking a civil penalty as authorized in this section does not preclude the city from seeking alternative relief from the court in the same action. Such alternative relief may include, but is not limited to abatement or injunctive relief.

23.03 CIVIL CITATIONS. Civil citations shall be used to charge municipal infractions and shall be administered as follows:

(1) A City employee or a City Official authorized by the City Council to enforce the Code or regulations may issue a civil citation to a person who commits a municipal infraction.

- (ii) The name or description of the alleged infraction, attested to by the officer issuing the citation.

- e. Appeal Powers. The board shall have the following powers:

- i. Effective Dates of Variance. Any variance granted by the Board of Adjustments shall take effect 15 days following filing of the Board's decision with the City Clerk. A variance shall remain effective and a building permit may be issued in conformance therewith for a period of one year from October 1, 1994, or one year from the filing of the Board's decision whichever date is later.
- j. Appeal to City Council. The City Administrator, the Zoning Administrator and Zoning Commission, or any person aggrieved by any final decision of the Board of Adjustment may appeal such decision of the Board to the City Council for review.

SEC. 65.1 PURPOSE. The purpose of this chapter is to protect the health, safety and welfare of the citizens and safety of property in the city by providing for removal and disposal of abandoned motor vehicles.

SEC. 65.2 DEFINITIONS. Definitions used in this chapter.

1. The term "abandoned vehicle" means any of the following:
 - a. A vehicle that has been left unattended on public property for more than 48 hours and lacks current registration plates, or two or more wheels, or other parts which renders the vehicle totally inoperable; or
 - b. A vehicle that has remained illegally on public property, excluding public parking lots for more than 48 hours; or
 - c. A vehicle that has been unlawfully parked on private property or has been placed on private property without the consent of the owner or persons in control of the property for more than 24 hours; or
 - d. A vehicle that has been legally impounded by order of the city police and has not been reclaimed for a period of 10 days; or
 - e. Any vehicle parked on a street determined by the city police to create a hazard to other vehicle travel;
 - f. However, a vehicle shall not be considered abandoned for a period of 15 days, if its owner or operator is unable to move the vehicle and notifies city police authorities responsible for the geographical location of the vehicle, and requests assistance in the removal of the vehicle.

2. The term "demolisher" means any city or public agency organized for the disposal of solid waste, or any person whose business it is to convert a vehicle to junk, process scrap or scrap metal, or otherwise to wreck or dismantle vehicles.

SEC. 65.3 AUTHORITY TO TAKE POSSESSION OF ABANDONED VEHICLES. City police may, and on the request of any other authority having the duties of control of the highways or traffic, shall take into custody any abandoned vehicle on public property and may take into custody any abandoned vehicle on private property. The city police may employ its own personnel, equipment and facilities, or hire other personnel, equipment and facilities for the purpose of removing, preserving, storing or disposing of abandoned vehicles.

SEC. 65.4 NOTIFICATION OF OWNERS AND LIENHOLDERS.

1. City police taking into custody an abandoned vehicle shall notify, within 20 days, by certified mail the last known registered owner of the vehicle, and all lienholders of record, and any other known claimant to the vehicle or to personal property found in the vehicle, addressed to their last known addresses of record, that the abandoned vehicle has been taken into custody. Notice shall be deemed given when mailed. The notice shall describe the year, make, model and V.I.N. number of the vehicle, describe the personal property found in the vehicle, set forth the location of the facility where the vehicle is being held, and reclaim the vehicle and personal property within 21 days after the effective date of the notice, upon payment of all towing, preservation and storage charges resulting from placing the vehicle in custody and upon payment of the costs of notice required pursuant to this subsection. The notice shall also state that the failure of the owner or lienholders to exercise their right to reclaim the vehicle within the time provided shall be deemed a waiver by the owner and all lienholders of all right, title, claim and interest in the vehicle and that failure to reclaim the vehicle is deemed consent to the sale of the vehicle at a public auction or disposal of the vehicle to a demolisher. The notice shall state that any person claiming rightful possession of the vehicle or personal property who disputes the planned disposition of the vehicle or property by the city police or of the assessment of fees and charges provided by this section may ask for an evidentiary hearing before the police chief to contest these matters. If the persons receiving the notice do not ask for a hearing or exercise their right to reclaim the vehicle within the 21 day reclaiming period, the owner and lienholders shall no longer have any right, title, claim or interest in or to the vehicle. No court in any case in law or equity shall recognize any right, title, or interest of the owner and lienholders after the expiration of the 21 day reclaiming period.
2. If the identity of the last registered owner cannot be determined, or if the registration contains no address for the owner, or if it is impossible to determine with reasonable certainty the identity and addresses of all lienholders, notice by one publication in one newspaper of general circulation in the area where the vehicle was abandoned shall be sufficient to meet all requirements of notice under this section. The published notice may contain multiple listings of abandoned motor vehicles but shall be published within the same time requirements and contain the same information as prescribed for mailed notice in subsection (1) of this section.
3. The owner or any lienholders may, by written request deliver to the city police chief prior to the expiration of the 21 day reclaiming period, obtain an additional 14 days within which the vehicle may be reclaimed.

SEC. 65.5 AUCTION OF ABANDONED VEHICLES. If an abandoned vehicle has not been reclaimed as provided in Section 65.4, the police chief shall make a determination as to whether or not the vehicle shall be sold for use upon streets and highways. If the vehicle is not sold for use upon the streets and highways, it shall be sold without public auction for junk or demolished and sold as scrap after complying with the notification procedures enumerated in Section 65.4. If the police chief determines the vehicle is suitable for use upon streets and highways then city police shall sell the vehicle at public auction. The purchaser of the vehicle takes title free and clear of all liens and claims of ownership, shall receive a sales receipt from the city police, and is entitled to register the vehicle and receive a Certificate of Title if sold for use upon the streets and highways. However, if the vehicle is sold or disposed of to a demolisher for junk, the sales receipt by itself is sufficient title, only for purposes of transferring the vehicle to the demolisher for demolition, wrecking or dismantling and, when so transferred, no further title of the vehicle is permitted.

From the proceeds of the sale of an abandoned vehicle, city police shall reimburse the city for the expenses of the auction, the costs of towing, preserving and storing which resulted from placing the abandoned vehicle in custody, all notice and publication costs incurred pursuant to Section 65.4, the cost of inspection and any other costs incurred, except costs of bookkeeping and other administrative costs. Any remainder from the proceeds of a sale shall be held for the owner of the vehicle or entitled lienholder for 90 days, and shall then be deposited in the state road use tax fund. Where the sale of any vehicle fails to realize the amount necessary to meet costs, the police chief shall apply for reimbursement from the state road use tax fund as provided by law.

SEC. 65.6 STORAGE CHARGE. A storage charge in an amount established by resolution of the city council shall accrue to any abandoned vehicle taken into custody under this chapter and stored upon city property.

It is subject to periodic flooding, which has resulted in major property damage and loss of life. The city has expended large sums of public money for flood control projects to minimize flooding in the dry run area, including construction of a retention basin to control discharging waters into the dry run.

SEC. 68.2 PURPOSE. The purpose of this chapter is to protect the safety of the citizens and property in the city by prohibiting conditions which might interfere with the efficient conveyance of flood waters through the dry run and to promote the health and sanitation of the community by prohibiting conditions causing standing water conducive to breeding insects. It is recognized that this chapter is not a solution to flooding of the dry run.

SEC. 68.3 DEFINITIONS.

1. The term "dry run" as used in this chapter shall mean natural waterways extending through the west part of Waverly and more specifically defined as the south branch and the north branch as follows:
 - a. South Branch. The natural waterway extending west from the Cedar River from approximately Seventh Avenue Southwest on west to its point of intersection with Fourth Street Southwest (Highway 218) between Seventh Avenue Southwest and Eighth Avenue Southwest.

b. North Branch. The natural waterway extending west from the Cedar River at approximately Seventh Avenue Southwest on north and west to its points of beginning; in the Willow Lawn area, approximately 1000 feet west of Twenty-fourth Street Northwest immediately north of Third Avenue Northwest; and north of Fifth Avenue Northwest, at its point of intersection with Twentieth Street Northwest. (Ord. 1015 11/29/16)

2. The term "Dry Run Channel" includes all areas within the boundaries which confine water to its channel throughout the entire width when the dry run waterway is carrying its maximum quantity of water.
3. The term "foreign object" as used in this chapter shall mean any object or thing, except vegetation, located in the dry run channel that is not a structural part of the channel.

SEC. 68.4 PROHIBITED ACTIVITIES. No person shall engage in any of the following activities within the dry run channel:

3. Failure to remove the cited foreign object or trim the cited vegetation, or request a hearing within the time prescribed, will cause the person to be guilty of a Municipal Infraction and the city may at its option abate the nuisance and direct assessment of the costs against the violator and/or pursue prosecution therefore. (Ord. 1015 11/29/16)

SEC. 68.8 DUTY OF CITY. The public works department of the city shall have the duty to check the entire dry run channel at least two (2) times each calendar year, for violations of this chapter.

1. At the conclusion of the hearing, the city administrator shall render a written decision as to whether a nuisance or prohibited condition exists. If he finds that a nuisance or prohibited condition exists, he must order it abated within an additional 48 hours. SEC. 69.12 COLLECTION SERVICE CHARGES--EXEMPTIONS FOR STORAGE BUILDINGS.

Buildings used solely for storage even though having separate electric or water utility connections may be exempted from solid waste collection charge upon the owner or renter of said premise filing an affidavit with the City certifying that the premise is used only for storage purposes and does not generate any solid waste. After the discontinuance of solid waste collection charges with this certification, any premise found to be generating solid waste or any such owner or renter found to be in violation of any State or City regulations regarding the disposal of solid waste shall be billed retroactively for all monthly solid waste charges to the time that the certification was filed.

SEC. 69.13 COLLECTION SERVICE FEE PROVISIONS. The collection of solid waste as provided by this chapter and the maintenance of the availability of such services, whether or not such service is used regularly or at all by the owner of such premises, is declared a benefit to the premises at least equal to the monthly charges specified pursuant to this chapter and in case of failure to pay the monthly charge when billed, as heretofore provided, then the monthly charge shall be assessed against the property benefited in the manner provided by and for special assessments, and in accordance with the present State Code of Iowa.

SEC. 69.14 DELINQUENT ACCOUNTS--SPECIAL ASSESSMENT PROCEDURE.

2. Resolutions shall thereupon be prepared assessing the delinquent charges to the properties so benefited. Such resolution, properly passed by the council, shall be certified as provided by law in cases of special assessments for collection in the same manner as general taxes.
3. In the case of the delinquency on the part of renters, lessors, etc., the accounting department shall pursue all legal avenues available to secure collection of delinquent solid waste fees, in accordance with and as provided for in this chapter.

SEC. 69.15 VIOLATION--PENALTY. Any person violating any of the provisions in this chapter, except those requiring the payment of fees for collection services, shall upon conviction be punished as provided in this code.

The costs of clean up shall be borne by the responsible person. If the responsible person does not cause the clean up to begin in a reasonable time in relation to the hazard and circumstances of the incident, the city may, by an authorized officer, give reasonable notice, based on the character of the hazardous condition, said notice setting a deadline for accomplishing the clean up or that the city will proceed to procure clean up services and bill the responsible person. Sections:

- 72.1 Purpose.
- 72.2 Definitions.
- 72.3 Where Permitted.
- 72.4 Enclosure Requirements.
- 72.5 Number of Chickens Permitted.
- 72.6 Permit Requirements.

Sec. 72.1 Purpose. The purpose of this chapter is to protect the health, safety and welfare of the citizens within the City by allowing a process by which a property owner may keep a limited number of domesticated chickens on their property while observing minimum property standards.

Sec. 72.2 Definitions. Definitions used in this chapter.

1. Chicken shall mean a member of the subspecies *Gallus gallus domesticus*, a domesticated fowl.
2. Urban chicken shall mean a chicken kept on a permitted tract of land pursuant to a permit issued under this Chapter.
3. Coop shall mean a cage, enclosure or building used for housing and protecting chickens from weather and predators.
4. Pen shall mean an enclosure for chickens which allows freedom of movement but also prevents escape.
5. Permittee shall mean an applicant who has been granted a permit to raise, harbor or keep chickens pursuant to this Chapter.

Sec. 72.3 Where Permitted. Notwithstanding the provisions of this section, the keeping of domestic chickens (sub species *gallus gallus domesticus*), except roosters, shall be permitted in single family residential properties so long as such keeping is in compliance with this subsection and all other applicable City ordinances. (Ordinance 1102 – Published on 5/24/22)

Sec. 72.4 Enclosure Requirements. The following criteria shall be considered a minimum form of compliance for the City to consider issuing a permit allowing for the presence of any particular chickens unless allowing such chickens would endanger the health, safety, peace, quiet, comfort, enjoyment of, or otherwise become a public nuisance to nearby residents or occupants or places of business:

1. Chickens must be confined in a coop, fowl house, or mobile coop, known as a chicken tractor, not less than 18 inches in height. In addition to be confined within a coop, a fenced pen area at a size outlined below shall be maintained. Chickens must be kept within the coop, the fowl house, or the fenced pen area at all times unless removed for a temporary time for the safety of the chicken.

2. The coop, the fowl house, or the fenced pen area must be of such a design to be reasonably expected to prevent entry by dogs, cats, or other animals and shall be completely enclosed.
3. The coop or fowl house must be used for chickens only and must be well ventilated.
4. The coop, the fowl house, or the fenced pen area shall have a minimum of four (4) square feet of floor area for each chicken but shall not be any larger than twelve (12) square feet of area for each chicken. The coop, fowl house, or fenced pen area shall be a minimum of twenty-five (25) feet from any neighboring dwelling property line. Chicken tractors shall be a minimum of ten (10) twenty-five (25) feet from any property line at all times. In the event a zoning or other ordinance requires a greater distance, the more restrictive regulations shall apply.
5. Any coop, fowl house, or fenced pen area must be well drained so there is no accumulation of moisture.
6. Any coop, fowl house, or fenced pen area shall be kept clean, sanitary and free from accumulation of chicken excrement and objectionable odors. All droppings and body excretions shall be either placed in fly-proof containers and double-bagged in plastic bags or, in the alternative, used as fertilizer on the same property or, with the owner's permission, on other property within the City, so long as the droppings and body excretions are spread and incorporated into the soil within twenty four (24) hours.
7. In addition to the coop, fowl house, or fenced pen area, the permittee shall be responsible for sufficiently confining chickens to the permitted property and prevent chickens from entering upon any adjacent property.
8. All chicken feed shall be stored in rodent-proof containers.
9. All such chickens must be hens; no roosters are permitted.
10. The City shall not be liable for injury or death of chickens caused by dogs, cats, or other animals, domestic or wild, whether such animals are licensed by the City or not. Further, injury or death of a chicken caused by an animal is not, in and of itself, sufficient grounds for the City to determine that the animal is a vicious animal pursuant to this Code of Ordinances. Any dead chicken shall be disposed of immediately upon discovering said dead chicken in a manner so as to not cause a nuisance pursuant to this Code of Ordinances.
11. Slaughtering of chickens or selling of eggs are forbidden
12. An owner or possessor of animals on property that is newly annexed or rezoned to a residential classification has ninety (90) days from the date of annexation or rezoning to bring the property into compliance required by this section.
13. A violation of this subsection is a municipal infraction as provided in this Code of Ordinances.

Sec. 72.5 Number of Chickens Permitted.

1. No more than four (4) chickens shall be kept or maintained per property at any time.

Sec. 72.6 Permit Requirements. No person shall keep any chickens unless they possess a City of Waverly permit issued by the City Administrator or their designee.

1. Fee. The fee for such permit shall be thirty (\$30) dollars.
2. Permits will be granted for one (1) three (3) years valid from January 1 through until December 31 and shall not be pro-rated for partial year three years from the application year.
 - a. Permits may be purchased at any time during the year but will be valid only through December 31.
 - b. Property owner shall notify the City upon discontinuance of housing chickens.
 - i. As part of discontinuing of housing chickens on the property, the pen and coop areas shall be cleaned in a timely manner so as to not provide a nuisance to neighboring property owners.
 - c. Fees shall not be refunded if the property owner removes the chickens from the premises.

- d. The permit may be suspended or revoked by the City Administrator or their designee upon hearing and finding evidence that the permittee has violated the conditions of the permit and listed in this Section of the Code. All chickens must be removed from the premises and disposed of in accordance with public health practices upon revocation of the permit. There will be no refund of the permit fee. All associated costs of removal of the chickens shall be assessed back to the property owner.
- e. By the granting of the permit to raise chickens and the application thereof, the permittee authorizes that the City or its agents have the right to go onto permittee's property any time for the limited purpose of inspection of the premises to ensure that all applicable conditions have been met.

SEC. 74.2 SERVICE APPLICATION. No premises shall receive water service from the city unless the person serviced applies for such service. Refer to Sec. 74.12 WATER/EXCAVATION PERMIT.

SEC. 74.3 UTILITY FUND. The finance director shall maintain a fund to be known as the "water division utility fund". There shall be placed to the credit of that fund all monies accrued and on hand from water service charges. Additionally, all receipts and expenses incurred relative to the operation of the "water division enterprise" with the exception of Section 74.4 following.

SEC. 74.6 PENALTY. If a payment is delinquent, a penalty charge shall be assessed against the person who is liable for the delinquency. The penalty charge shall not be more than one and one-half (1 1/2) percent of the monthly payment that is delinquent.

SEC. 74.7 REFUNDS. Waverly Municipal Code Section 74.7 "Refunds" pertaining to water service charges is repealed in its entirety. Ordinance No. 717

SEC. 74.8 PERMANENT DISCONNECTION. If the person seeks a permanent disconnection of service from the premises, the person must remove the water meter and cut and disconnect the service appropriately at the water main under the direction of the public works director and deliver such meter to the water division.

All water services that become obsolete because of the laying of new or larger services must be cut and shut off at the water main and reported to the water division. When a building is to be demolished or moved, eliminating the need for a water service, the water service must also be cut and disconnected at the water main. If plans are to rebuild on the property, the water service must be abandoned back to the curb stop. Acceptable means of disconnection include removing and plugging corporation stop at the main or shutting off

the corporation stop and placing copper disc to plug the stop. Galvanized or lead services must be replaced or disconnected at the main.

SEC. 74.9 CONTRACT. The provisions of this chapter, including rules and water rates adopted pursuant to this chapter, shall be incorporated in a contract between the city and any person to whom the city shall furnish water service.

SEC. 74.10 DISCONNECTION. If any provision of this chapter, including rules and water rates adopted pursuant to this chapter, is violated, water service to the premise subject of the violation may be disconnected.

SEC. 74.11 SERVICE RESUMED. Upon correction of the violation, the water service may be resumed to the premise subject of the violation, if the director is satisfied that another violation will not occur. The director may set conditions for the resumption of services. The person who violates a provision shall pay the cost of discontinuing service and resuming service. The payment for the period that service was disconnected may be declared forfeited by the director.

SEC. 74.12 WATER/EXCAVATION PERMIT. A permit is required to create a new water service connection or to repair/adjust an existing water service or connection, including any work between the building and the water main (including any water main work). The permit application must be completed and submitted with a \$25 application fee. After review of the application, a permit will be issued allowing work to proceed. All code requirements must be followed, and the work must be inspected as directed by the permit.

(Passed December 4, 2023 and Published January 9, 2024)

SEC. 74.13 MULTIPLE BUILDINGS. A tap or service pipe shall service only one building unless the following apply:

1. **Application.** If a tap or service pipe is to service more than one building, the owner of a building that may be serviced by such tap or pipe must apply to the city for a special permit. Attached to the application must be an agreement executed by all owners of buildings serviced by such taps or pipes. The terms of the agreement must specify the persons who will own the taps or pipes and how the taps or pipes will be maintained. Such agreement shall be recorded with the Bremer County Recorder. Upon being recorded the agreement shall run with the affected property or properties.
2. **Director.** The director must approve the application. An application shall not be approved unless the director determines that service to only one building from a tap or service pipe is impractical.
3. **Curb-stops.** There shall be installed on each branch of the applicable service pipe, a curb-stop that satisfies the requirements of Section 74.16.
4. **Specifications.** If a service pipe has a branch connection, such pipe shall be at least one (1) inch in diameter.

SEC. 74.14 TAPPING. The tap shall not be larger than one (1) inch, unless the tapping complies with the following:

1. Saddle & Corporation Stops. A saddle and corporation stop must be used for the following connections (refer to SEC. 74.37 for allowable fittings):
 - a. One and a quarter (1 1/4) inch connections.
 - b. One and a half (1 1/2) inch connections.
 - c. Two (2) inch connections.
2. Valve & Sleeve Arrangement. A valve and sleeve arrangement must be used for the following connections:
 - a. Four (4) inch connections.
 - b. Six (6) inch connections.
 - c. Eight (8) inch connections.
 - d. Ten (10) inch connections.
 - e. Twelve (12) inch connections.
3. Main Tapping. A main tap must be at least twelve (12) lineal inches from another such tap, horizontal, and staggered at least thirty (30) degrees from a point zero (0) degrees on a horizontal plane to a point seventy (70) degrees above such plane one side and/or from a point one hundred ten (110) degrees to one hundred eighty (180) degrees on the horizontal plane of the other side. A tap shall not be made within twelve (12) inches of the union/bell. Contractor must notify the public works office 24 hours prior to tapping water mains to allow inspection of the work.

SEC. 74.15 SERVICE PIPES.

1. Specifications. A service pipe must be not less than one inch in diameter. Such pipe must be a type K copper tube or CTS poly. (Refer to SEC. 74.37 Acceptable Materials for specifications)
2. Installation. A service pipe must be installed beneath the surface of the ground at a level where the main pipe is installed beneath a street. The service pipe must be installed to prevent rupture by freezing. A service pipe may service a lot, if the connection is made from the main located adjacent to the lot to be serviced. However, a service pipe shall not service a lot by crossing another lot.
3. Curb Stop. A curb stop must be installed on each service pipe. Installation of the curb stop must satisfy the following criteria (Refer to SEC. 74.37 Acceptable Materials for allowable fittings):

- a. Accessible. The person served by the service pipe must have ready access to the curb stop.
- b. Shutoff. The curb stop must function to allow water service to the property served by a water service pipe which could be shut off.
- c. Placement. A curb stop must be placed in the service pipe at least twelve (12) inches within the property line of the lot served by the service pipe. The curb stop must be protected by a box as detailed in the specifications sheet. The box must have a metal cover labeled with the letter "W" or the word "water" which is clearly visible and at pavement or ground level or higher. (Refer to SEC. 74.37 Acceptable Materials for allowable fittings)

4. Maintenance.

- a. Owner. A person who owns the premises where buried pipes, including service pipes, connections, curbstops, corporation stops, service valves, and meter valves are located shall maintain such pipes, if the premises are served by such pipes. The person must ensure the safety and efficient operation of the pipes, prevent rupture from freezing, and prevent obstructions in the pipes and leakage from the pipes.
- b. Service leaks. All water leaks on the service pipe or interior building pipes will be the responsibility of the owner to repair. Leaks shall be repaired as soon as possible, but within 14 days. If not repaired promptly, the city shall, after written notice to the owner, turn off the water until such repairs have been made. If the water cannot be turned off, or there are public safety concerns, or excessive water loss which in the opinion of the director constitutes an emergency requiring repair in under 72 hours, the city will hire a private contractor to complete the repairs and assess the cost to the property owner. If the leak is determined to be the water main, the city shall pay for costs incurred.
- c. City. If the public works director determines that any buried pipe, including service pipes, connections and curbstops, does not comply with a provision of this chapter the director may order that the owner of the pipe repair or replace such pipe. Also, the director shall have the authority to order unsafe piping repaired adjacent to and attached to the water meter.

5. Liability. The city or a city employee acting within the scope of employment shall not be liable for damage resulting from work performed on buried pipes or from any discontinuance of water service, if the following apply:

- a. Necessity. The action by the city was performed in the course of installing or repairing service facilities, or an emergency required such work or discontinuance of service; and
- b. Negligence. The damage or discontinuance was not the direct result of negligence by the city.

6. Backflow Prevention. The city defers to the Bremer County Building, Zoning and Sanitation department

for backflow prevention requirements.

SEC. 74.16 GENERAL PLUMBING. If the connection/stub that was put in with the installation of the water main is not suitable for the needs of the property, a new tap may be approved by the director. The property owner will be liable for the unused connection/stub.

SEC. 74.17 WATER CONTROL. The water system shall be under the direct supervision of the director who shall regularly report to the administrator on matters pertaining to the water system. The director may authorize any qualified person to inspect or perform work specified in this section.

SEC. 74.18 POWERS AND AUTHORITY FOR INSPECTION.

1. Access to Private Property.
 - a. General. Any person authorized by the director may enter any premises to inspect, observe, measure, sample or test water. However, if the owner or occupant of the premises objects to inspection, the inspector shall enter the premises only after obtaining a warrant from a magistrate.
 - b. Police Department. The police department shall cooperate with the director to enforce this section.
 - c. Limitations. The inspector shall not have any authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper or other industries beyond the point having a direct bearing on the kind and source of use to the public water works.
2. Easement Access. An authorized inspector or worker after bearing proper credentials and identification to the owner or occupant of the premises, shall enter the private premises to inspect, observe, measure, sample, install, repair or maintain any part of the water works that are located within an easement held by the city. Entry and any inspection or work within the easement shall comply with the terms of the easement.
3. Liability.
 - a. Duty of Care. While performing inspections or work on the premises, the inspector or worker shall observe all applicable rules established by the owner or occupant.

1. Introduction: The purpose of this policy is to assist residential customers with unexpected water/sewer bill increases caused by water leaks. This policy will help the city reduce water waste and maintain a sustainable economically viable water and sewer system.
2. Statement of Responsibility: It is the customer's responsibility to avoid, identify, and repair all water leaks on or within their property. The city will not reimburse for increased water and sewer charges that result from customer negligence, which includes but is not limited to insufficient heat or the lack of power. The city is not liable for increased costs or damages caused by a water leak on the customer's property. The city grants bill adjustments based on merit and does not discriminate on the basis of sex, gender, age, race, ethnicity, religion, or place of origin.
3. Qualifications for Residential Water and Sewer Adjustments: The following criteria must be met in order to qualify for an adjustment:
 - a) Customer has not been issued a high water adjustment in the past five years. The customer is the utility account holder. Others living at the address or having an interest in the address (including landlords, customers' roommates, family members, and others living in the same dwelling) are not eligible to apply for an adjustment.
 - b) Customer has identified a leak on the property and has communicated knowledge of the leak with the city. Ways to identify a leak:
 - Customer notices a significant increase on their Waverly Utilities bill, specifically the water and sewer charges.
 - Customer has knowledge of a leak.
 - City of Waverly or Waverly Utilities notifies the customer of a potential leak via phone, email, in person, or by door hanger.
 - c) Customer stops the excess water flow within 24 hours of an identified leak.

 - d) Customer has repairs completed within 30 days of an identified leak.
 - e) The leak results in one monthly utility bill having a combined water and sewer charge of \$150 more than the average monthly water and sewer charge. The 12 previous monthly charges will be used to calculate the average. If 12 months are not available, the average will be calculated using the history that is available.

- f) Customer submits completed high water adjustment form and proof of the completed repair (e.g. plumber certification, copy of receipts, etc.) to the city within 30 days of the leak being repaired. The form can be obtained from Public Services and submitted in the following ways:
- By email to PublicServices@waverlyia.com
 - In person to Waverly Public Services at 2900 5th Avenue NW, Waverly, IA
 - By mail to Waverly Public Services at P.O. Box 616, Waverly, IA 50677

Group III. Class III permit users.

Group IV. Special rates.

3. Basis of Rates. The rates for comprehensive wastewater service charges shall be reviewed at least every two (2) years. Such rates may be revised as necessary to ensure that the system generates adequate revenues to pay the costs of operating and maintaining the wastewater facilities. The system of charges must ensure a proportional distribution of costs as provided below.
4. Proportional Distribution. At the end of the fiscal year an adjustment must be calculated for each user group based on actual costs incurred and actual group loadings contributed during the previous fiscal year. The adjustment for each user group shall be applied to the group charge for the coming fiscal year. A separate adjustment shall be calculated for each Group I, Group II, Group III and Group IV users.
5. Charges.
 - a. Operation and Maintenance Charges for the Water Pollution Control Plant. The operation and maintenance charges shall provide revenue to pay for the costs of operation and maintenance of the water pollution control plant. The operation and maintenance costs include salaries and fringe benefits, utilities, chemicals, equipment repair, maintenance and all other miscellaneous expenses resulting from the operation of the water pollution control plant. The allocation of the plant operation and maintenance charge shall be based upon the quantities of flow, BOD and SS discharged by a user. The unit cost shall be determined as follows:
 - (1) Unit Flow Cost. The unit flow cost per one thousand (1000) gallons shall be determined by multiplying the anticipated O & M budget by that percentage attributable to flow related operations and dividing by the anticipated year's total flow to the water pollution control plant.
 - (2) Unit BOD Cost. The unit BOD cost per pound shall be determined by multiplying the anticipated O & M budget by that percentage attributable to BOD related operations and dividing by the anticipated year's total BOD load at the water pollution control plant, measured in pounds.
 - (3) Unit Suspended Solids. The unit SS cost per pound shall be determined by multiplying the anticipated O & M budget by that percentage attributable to SS related operations and dividing by the anticipated year's total SS load at the water pollution control plant, measured in pounds.
 - b. Sewer Maintenance Charges. Each user shall pay a sewer maintenance charge. The sewer maintenance charge shall pay for the maintenance of both sanitary and

storm sewers. The cost shall be shared evenly by all sewer users. The cost per user shall be determined by dividing the anticipated budget by the total number of users which determines the total annual charge to be recovered from each user.

- c. Debt Service & Replacement Fund Charge. A debt service and replacement fund charge shall be collected to pay the city's cost for capital improvements and to provide revenue for a replacement fund. The replacement fund shall be maintained to provide funds for replacement of items of equipment and appurtenances at the water pollution control plant. Funds which are available from revenue collected by the debt service and replacement fund charge after payment of the bond principal and interest and bond coverage shall be transferred to the replacement fund. The debt service-replacement fund charge shall be derived by establishing a unit cost for flow, BOD and SS. The unit costs shall be derived for each parameter by dividing the capital costs attributable to each parameter by the capacity of the capital improvements. Each permit user shall pay a debt service charge and replacement fund charge based upon their permit discharge values.
- d. Service Charge Payments. Service charges shall be established for each group of users by resolution, provided that the resolution is consistent with this chapter. Revenue from the monthly charges shall be used for sewer maintenance and debt service. The basis for the amount charged to each group shall be based on the following:
 - (1) Group I. The total periodic billing for sewer charges to Group I users shall be based upon water meter readings.
 - (2) Group II. The total periodic billing for sewer charges to Group II users shall be an amount based upon water meter readings and a permit surcharge factor (PSF). The PSF shall be determined by the director and noted on the discharge permit. The PSF shall be calculated by dividing the total O & M charges as set forth for Group III by the O & M charges established for Group I.
 - (3) Group III. The total period billing for sewer charges to Group III users shall be the sum of the plant O & M based upon monthly average values obtained from in situ measurements and samples, the sewer O & M and the debt service replacement fund charge based upon maximum values obtained from the users discharge permit.
- e. Special Rates. The council may, by resolution, set special rates for certain users, upon reviewing any recommendation presented by the director, if applying the usual rates would be inequitable to the city or to the user. Cases where the city may set such special rates includes the following:
 - (1) Waste Character. The character, including the nature or use of the sewage or industrial waste requires an abnormal amount of work to purify.

- (2) Pollution Level. The major portion of the city water consumed is not polluted or is not discharged into the sanitary sewer.
 - (3) Privately Produced Water Supplies. The water is produced from privately produced supplies. The special rates established must be calculated on an equal basis with the rates which would apply to an equal quantity and character of waste originating through the use of city water. The director shall designate any means necessary to measure the private water supply and resulting sewage flow, including any installation at the expense of the private producer. The producer shall cooperate with the director and report any information necessary to make the determination.
6. Payment Collection. The city shall bill each user of the sanitary sewer on a schedule compatible with the city water department.
 - a. Collection of Charges. The finance director shall collect wastewater service charges in conjunction with the water rentals in accordance with the schedule of rates provided in this chapter or otherwise approved by the council. The finance director must maintain accurate and complete records of such collections and shall deposit the collections in a banking institution designated as the official depository of city funds. The finance director shall regularly report to the administrator a complete statement of collections made, pursuant to procedures established by the administrator. The finance director shall charge to the water pollution control facilities account the cost to the accounting department of collecting wastewater charges. The billing charges shall be subject to the approval of the council.
 - b. Failure to Pay Wastewater Service Charges.
 - (1) City Water Consumer. If the person liable for a payment is a consumer of city water, the wastewater service charges shall be subject to the same rules related to delinquency and suspension of service as applies to water service. The city shall have a lien upon the property served by a sanitary sewer for the amount of delinquent wastewater service charge payments. The clerk shall certify all delinquent wastewater service charges to the county auditor for the purposes of taxation and establishing a lien on the property. For the purposes of certification only, service payments shall be designated as delinquent when records show that service payments have been unpaid for a period of at least one month after the due date.
 - (2) Private Water Supply. If a person liable for the payment receives water from a private supply, the person shall be subject to the same provisions described in paragraph 1 of this subsection.

(Amended 3/20/23 by Ordinance. 1116)

SEC. 75.15 GENERAL MONITORING. The waste discharge of any user of the water pollution control facility may be monitored by the city. The director shall monitor at least once each year the waste discharge of a permit user or special rate user. The discharge permit shall state when monitoring may occur.

SEC. 75.16 SAMPLING MANHOLE. The director may require a permit user discharging wastes into the city's sanitary system to construct a sampling manhole according to standards adopted by the director. The sampling manhole must be located downstream from any treatment, storage tank, or other approved works, to facilitate observing, measuring, and continuous sampling of wastes from the permit user. Continuous sampling shall be performed by an automatically operated sampling device. The measurement of continuous flow shall be indicated, recorded, and totalized. If pH control is required or if other waste characteristics require special control, the user shall install waste monitoring equipment, approved by the director, to monitor and record such characteristics. The sampling manhole shall be accessible to persons authorized by the director, at any time. The sampling manhole shall be installed pursuant to plans approved by the director. The user shall install and maintain the control structure to be accessible and operating at all times. The director may waive the requirement for a sampling manhole, if the user pays wastewater service charges required under Section 75.14 and tests of the wastes produce results similar to tests from other users or are measurable by other reliable indicators as determined by the director. The tests shall be considered a reliable basis to charge the user.

SEC. 75.17 FLOW MEASUREMENT

1. In Situ Flow. The volume of flow used in computing sewer rental charges shall be based upon actual in situ flow measurements.
2. Alternative Measurement. If the director determines that is not practical to measure the actual sewage and industrial waste flow or the flow of diverted water, another manner of computing the amount of water diverted from or discharged into the public sanitary sewage system may be used by the division. If the director determines that it is not practical to make an actual measurement of the waste discharge from the premises of the customer into the public sanitary sewage system, the director may accept as the volume of waste discharged from the premises that which are shown by the city water meters.
3. Meter. If waste is discharged into the sanitary sewers of the city from premises where water is supplied by other than city sources, and such water is discharged into the sanitary sewers, the owner of the premises must install a water meter approved by the director to measure the volume of flow.

SEC. 75.18 TESTING WASTES

1. General. Any measurements, tests or analyses of the characteristics of waters and wastes shall be determined pursuant to the latest edition of "Standard Methods for the Examination of Water and Wastewater."
2. Sampling. Samples for testing shall be collected at sampling manholes. If a sampling manhole is not required, the sampling shall be performed at the downstream control structure in the public sewer, that is located nearest to where the building sewer is connected. Sampling shall be performed by customarily accepted methods approved by the director.

SEC. 75.19 ACCEPTABLE MATERIALS. The materials listed below are to be used in either new installations or repairs.

1. Sanitary Sewer Services. Gasket joint SDR 23.5 with crushed stone encasement (4" and 6" services). Schedule 40 PVC is required for sewer service entry within five feet of the basement/building.
2. Sanitary Sewer Mains. Gasket joint SDR 35 with crushed stone encasement (8"-15")

SEC. 75.20 SEPTIC HAULER PROGRAM.

1. Definitions:
 - a) **Administrator.** The term "administrator" means the city administrator.
 - b) **Director.** The term "director" means the public works director for the city.
 - c) **Waste Hauler.** The term "waste hauler" means any person, firm, or entity engaging in the collection, removal, or transportation of wastewater for the purpose of disposing at the wastewater treatment facilities.
 - d) **Wastewater.** The term "wastewater" means the spent water of a community. It may be liquid or a combination of liquid and water carried wastes. For the purpose of this program, wastewater includes any privy vault, cesspool, sump, septic tank, chemical toilet, or acceptable commercial/industrial waste intended to be disposed of at the wastewater treatment facilities.
 - e) **Water Pollution Control Facilities.** The term "water pollution control facilities" or "wastewater treatment facilities" means the publicly owned structures, equipment, and processes required to collect, convey, and treat wastewaters.
 - f) **Domestic Load.** The term "domestic load" means a load of wastewater or FOG that was generated within Waverly city limits.
 - g) **Non-Domestic Load.** The term "non-domestic load" means a load of wastewater or FOG that was generated outside of Waverly city limits.
2. Permit: No waste hauler shall collect, remove, or transport any wastewater for the purpose of delivering such waste to the wastewater treatment facilities without first obtaining a waste haulers permit issued by the City of Waverly.

All applications for waste hauler permits must be submitted in writing, using the approved permit application, to the City of Waverly WPCF PO BOX 616, Waverly IA 50677. Applications are subject to review and approval by the director.

Permits are valid for one year. The permit must be renewed prior to the expiration date specified thereon. Renewal applications must be made in the same manner as an initial application and shall be subject to review and approval by the director in the same manner as initial applications. Renewal applications must be submitted no later than thirty days prior to expiration of the expiring permit. Waste hauler permits are not transferable.

3. Rates: Fee for disposing of wastewater at the wastewater treatment facility is \$50.00 per 1000 gallons for domestic loads, or \$100.00 per 1000 gallons for non-domestic loads or loads originating outside of the Waverly city limits. The wastewater treatment facility does not have the instrumentation to determine how full the truck is, therefore it is assumed that the truck is always full. This charge will be based on the maximum capacity of the truck. This fee includes administrative and sampling costs associated with the program.

Fee for disposing of FOG (Fats, Oils, Grease) at the wastewater treatment facility is \$200 per load. Non-domestic FOG loads are not accepted.

4. Hours of Operation: Wastewater will be accepted at the disposal station between the hours of 0730-1500 Mondays through Fridays. Weekend and holiday hauling will not be accepted. Emergency hauling outside the normal working times will be accepted only upon approval of the director. This approval must be obtained at least 24 hours prior to the projected hauling time. A surcharge of \$100 for after-hours hauling may be assessed to compensate for overtime hours worked by city personnel.
5. Disposal Process: Waste haulers will be directed to first check in with Water Pollution Control Facility personnel at 1401 8th St SE Waverly, IA 50677. WPCF personnel will check necessary documentation/ information regarding the wastewater being hauled. Upon approval, the waste hauler will then be given a key to access the dump station at 801 Crestwood Ave SE Waverly, IA 50677. After disposal is complete, the key must be returned to WPCF personnel.

Waste haulers shall maintain the designated dumpsite at the disposal station in a clean, orderly condition so as to avoid noxious odors and unsanitary conditions. The hauler must satisfactorily clean up any spillage which occurs during discharge of hauled wastes.

6. Identification of Waste: Waste haulers must provide documentation of the nature and origin of wastes delivered to the wastewater treatment facility at the time of delivery. Such information shall be provided on a manifest form provided at the time of check in. A manifest form must be completed for each load discharged. The manifest shall include:
 - a) The name, address, and phone number of the waste generator
 - b) The type of waste collected
 - c) The approximate volume of the load

The director or designee shall have the right to verify the source, chemical nature, and volume of the material prior to disposal; including the right to sample and make chemical analysis thereof.

Random sampling of loads will be performed on a regular basis and waste hauler should be equipped with a way to obtain a representative sample. Fees for the additional testing are included in the normal hauling rate.

If the material is of a commercial or industrial origin, the waste hauler shall obtain approval for disposal of the waste from the director prior to loading the waste for delivery to the wastewater

treatment facility.

7. Waste Load Limits: Waste loads hauled from commercial or industrial sources must meet all applicable federal, state and local pretreatment standards. The director, prior to delivery to the disposal station, must approve loads from commercial or industrial sources. The city will routinely refuse to accept hauled wastes that can be land applied without additional treatment. All residential septic tank wastes that originate within the city limits of the city are acceptable. Waste loads must not be a hazardous waste as defined in 40 CFR Part 261 of the Federal Register, as amended.
Wastes from sand traps, such as those located in car, truck, and trailer washes, which primarily contain sand and dirt, **shall not** be routinely accepted for disposal at the wastewater treatment facility. Such wastes shall be land applied or land filled.

Wastewater containing contaminants listed in the Waverly City Code Section 75.9 "Prohibited Uses of Sewers" shall not be hauled to the wastewater treatment facility under any circumstances. Wastewater containing contaminants listed in the Waverly City Code Section 75.10 "Conditional Uses of Sewers" shall not be hauled to the wastewater treatment facility, unless written permission from the administrator or director is given to the hauler prior to delivery.

8. Suspension/Revocation: Any of the following shall constitute cause for the suspension or revocation of a permit issued under this program when committed by a permit holder or any employee, agent, or representative of a permit holder:
 - a) Giving any false or misleading statement concerning the nature, origin, or quantity of wastewater delivered for disposal.
 - b) Giving any false or misleading information in connection with any new application or renewal application.
 - c) Violation of any of the provisions of this program.

In the event of an occurrence warranting the suspension or revocation of any permit issued under this chapter, the following procedure shall apply:

- d) The director, or their designee, shall notify the permit holder, in writing, that the permit is suspended or revoked. Such notice shall be sent to the permit holder by certified mail, return receipt requested, at the address listed on the permit holder's application. The notice shall set forth the nature of the violation and shall set forth the period of suspension, or in the case of revocation, that the permit is revoked. The director shall have the authority to determine whether a violation requires suspension (and for how long) or whether the permit should be revoked. The notice shall advise the permit holder of their right to request a hearing on the suspension or revocation. The permit holder receiving a notice of suspension or revocation may request a hearing thereon before the director. The hearing request

must be in writing, must have a copy of the notice of suspension or revocation attached to it, and must be delivered to the public works office (2900 5th Ave NW, Waverly, IA 50677) no later than ten days after the date of such notice. If no request for hearing is made within the time set forth above, the suspension or revocation shall, upon the expiration of such time, become immediately effective and the permit holder shall have no right to further hearing or appeal. If timely request for hearing is made, the permit holder shall be notified in writing of the time, date and place of hearing which shall be no sooner than five, nor more than fifteen, working days following the Public Works Office receipt of the request for hearing.

- e) If a hearing is requested, the suspension or revocation shall not become effective until the written decision of the director is made; provided, however, that if the director determines that the violations constituting cause for suspension or revocation present an immediate hazard to person or property, the director shall so state in the notice of suspension or revocation and, in that event, the suspension or revocation shall be effective immediately upon its issuance.
- f) Any permit holder whose permit has been revoked shall be ineligible for another permit for a period of one year after the date of revocation.

9. Rejection of Loads: The director, or their designee, may reject any waste load delivered to the disposal station for disposal. Reasons for rejection include but are not limited to:

- a) Suspension or revocation of permit.
- b) Failure to obtain pre-approval for disposal of commercial or industrial wastes.
- c) Failure to complete a waste hauler manifest form.
- d) When a waste load exhibits unusual physical or chemical characteristics.
- e) When waste is from a source where pretreatment is necessary prior to disposal.
- f) To protect the wastewater treatment facility from damage.
- g) Non-payment of previous invoices.

SEC. 75.21 FOG PROGRAM.

1. Definitions:

- a) **Administrator.** The term "administrator" means the city administrator.
- b) **Director.** The term "director" means the public works director for the city.
- c) **Best Management Practices (BMPs).** Methods or techniques found to be the most effective in achieving an objective such as preventing or minimizing pollution. For this program, BMPs refer to methods and techniques used by Food Establishments to minimize the deposition of FOG. An example of BMP is scraping excess food or

solidified grease from cooking utensils, to be disposed of in the trash, before washing.

- d) **Fats, oils, and greases (FOG).** Organic polar compounds derived from animal and/or plant sources that contain multiple carbon chain triglyceride molecules. These substances are detectable and measurable using analytical test procedures established in 40 CFR 136, as may be amended from time to time. All are sometimes referred to herein as “grease” or “greases”. A wide range of food preparation activities can generate fats, oils, and greases.

- e) **Food Establishment (FE).** A place where food is prepared and intended for individual portion service, whether consumption occurs on or off the premises. These facilities include, but are not limited to, restaurants, food manufacturers, food processors, commercial kitchens, hospitals, schools, hotels, bakeries, caterers, religious institutions, correctional facilities, nursing homes, and care facilities.

- f) **Grease Interceptor:** An appurtenance or appliance that is installed in a sanitary drainage system to intercept non-petroleum fats, oils, and greases from wastewater. There are two types of grease interceptors: gravity grease interceptors and hydro-mechanical grease interceptors.
 - Gravity Grease Interceptor. Plumbing appurtenances of not less than 500 gallons capacity that are installed in the sanitary drainage system to intercept free-floating fats, oils, and greases from wastewater discharge. Separation is accomplished by gravity during a retention time of not less than 30 minutes. Gravity grease interceptors shall be installed outside for ease of inspection and hauling.

 - Hydro-Mechanical Grease Interceptor. A passive plumbing appurtenance or appliance that is installed in a sanitary drainage system to intercept non-petroleum fats, oils, and greases from wastewater discharge. Hydro-mechanical grease interceptors are identified by flow rate, separation, and retention efficiency. The design incorporates air entrainment, hydro-mechanical separation, interior baffling, barriers in combination or separately, and external flow control.

- g) **Grease Containment Device.** Any device or system that removes fats, oils, and greases from a waste stream.

- h) **Waste Hauler.** The term “waste hauler” means any person, firm, or entity engaging in the collection, removal, or transportation of wastewater for the purpose of disposing at the wastewater treatment facilities.

- i) **Water Pollution Control Facilities.** The term "water pollution control facilities" or "wastewater treatment facilities" means the publicly owned structures, equipment,

and processes required to collect, convey, and treat wastewaters.

2. Purpose: This program sets forth the uniform requirements for users of the City of Waverly's wastewater treatment facility to capture and dispose of fats, oils, and greases, enabling the city to comply with all applicable State and Federal regulations. No food establishment may intentionally or unintentionally allow the direct or indirect discharge of any fats, oils, or greases into the sanitary sewer system in such amounts as to cause interference with the collection and treatment systems.

Both new and existing FE facilities that generate in excess of 100 mg/l fats, oils, and greases as a result of food manufacturing, processing, preparation, or food service shall be subject to these requirements.

3. Existing Establishments: The existing facility is deemed compliant if there is a grease interceptor or other grease containment device in place and the following conditions are all met:
 - a) The FE continues to use the interceptor or other grease containment device.
 - b) The interceptor or other grease containment device is of sufficient capacity and design.
 - c) The interceptor or other grease containment device is operated and maintained so as to comply with the 100 mg/l FOG discharge limit.

Third party testing of a facility's waste stream, at the cost of the facility, shall be done annually to ensure the limits are being met. If a representative sample is unable to be collected, documentation regarding the design capacity of the grease containment device may be supplemented. Records of operation and maintenance will also be required in either scenario.

If the existing FE is deemed noncompliant, due to lack of grease containment equipment or not meeting the requirements listed above, the city will order the installation of an adequate grease interceptor. Deadlines for the completion of this process can be found below. The city will contact each FE with their designated "Risk Level".

Class 1 Establishments

- Notification of high-risk designation on or about September 1, 2023
- Permit application and interceptor proposal due no later than January 1, 2024
- Implementation of FOG program complete by March 1, 2024

Class 2 Establishments

- Notification of medium-risk designation on or about September 1, 2023
- Permit application and interceptor proposal due no later than January 1, 2024
- Implementation of FOG program complete by December 31, 2024

FEs which are unable to install or replace a grease interceptor due to physical constraints or

economic hardship may appeal to the city for approval of an alternative grease control technology. Such appeal should be submitted in writing and include detailed descriptions of the physical or financial constraints and of the alternative grease control technology which it proposes to utilize.

Regardless of compliance, each FE must submit a FOG application and comply with the requirements of this program. This includes proper documentation, cleaning, maintenance, and inspections. Penalties will apply to FEs that violate any part of this program.

4. **New Establishments:** After the effective date of this program, any permitted construction of a food establishment shall include an adequately sized grease interceptor. The owner of the FE must complete a FOG application based on the design capacity of the grease interceptor before being granted a food or occupancy permit.
5. **Grease Interceptors:** Grease interceptors shall be installed at the expense of the owner or operator of the FE which is contributing wastewater to the water pollution control facility. A proposed grease interceptor design is required with submittal of the FOG application if a facility is deemed to be noncompliant. Grease interceptors shall be designed and implemented according to the standards listed below.
 - ASTM C1613: Standard Specification for Precast Concrete Grease Interceptor Tanks
 - ASTM F2649: Standard Specification for Corrugated High-Density Polyethylene (HDPE) Grease Interceptor Tanks
 - ASME A112.14.3: Grease Interceptors
 - ASME A112.14.4: Grease Removal Devices
 - ASME A112.14.6: FOG (Fats, Oils, and Greases) Disposal Systems
 - IAPMO/ANSI Z1001: Prefabricated Gravity Grease Interceptors
 - UPC Chapter 10: Traps/Interceptors and Separators
 - PDI G101: Testing and Rating Procedure for Grease Interceptors with Appendix of Sizing and Installation Data

All waste streams containing FOG or reasonably likely to contain FOG within the FE shall be directed into one or more appropriately sized grease interceptors before discharge to the sewer system. Discharge lines which are not grease laden, which are not likely to contain FOG, or which contain sanitary wastes shall not be connected to the grease interceptor.

Bioremediation media is only allowed with written permission from the wastewater treatment facility. This request must be made before the implementation of the bioremediation media and must demonstrate that the FE has the appropriate FOG system in place. Additional testing may apply.

Gravity grease interceptors shall be installed outside the building and below surface grade, and shall have access manholes, with a minimum diameter of 24 inches, over each chamber and sanitary tee. Access manholes shall extend from the grease interceptor to at least the finished surface grade and be designed to prevent storm or surface water inflow. The

manholes shall also have readily removable covers to facilitate inspection and grease waste hauling. The minimum size of a gravity grease interceptor shall be no smaller than 500 gallons.

Hydro-mechanical interceptors shall be located downstream of each fixture or multiple fixtures in accordance with the manufacturer's instructions. Ready access shall be provided for cleaning, servicing, and inspection, at all times.

Hydro-mechanical and gravity grease interceptors shall be equipped with devices to control the rate of water flow so that the water flow does not exceed the rated flow. The flow-control device shall be vented and terminate not less than 6 inches above the flood rim level or be installed in accordance with the manufacturer's instructions.

The director or other designated official of the city shall inspect and approve each interceptor, ensuring that all applicable design standards and requirements are met.

6. **Cleaning and Maintenance:** Grease containment devices shall be maintained in an efficient operating condition at all times, in accordance to the manufacturer's instructions. All grease waste shall be properly disposed of at an approved facility in accordance with federal, state, and local regulation. The FE shall keep record what company was used to haul the FOG waste and approximately how much FOG waste was hauled.

Self-cleaning of hydro-mechanical interceptors is allowed, but only after written city approval. The following conditions must be met when a FE wants to self-clean:

- The grease interceptor is no more than 100 GPM size.
- Proper on-site material disposal methods are implemented (Ex. Adsorb material to dewater before disposing in the trash) or FOG is placed in leak proof, sealable container(s) located on the premises for a hauler to pump out.
- Detailed records are maintained and readily available for inspection.

Grease containment devices shall be cleaned as often as necessary to ensure that sediment and floating materials do not accumulate to impair the efficiency of the system as designed and approved. Grease containment devices shall be completely evacuated a minimum of every sixty (60) days, or more frequently when one of the following conditions is met:

- Twenty-five (25) percent or more of the wetted height of the grease trap or grease interceptor, as measured from the bottom of the device to the invert of the inlet/outlet of each chamber, contains floating material, sediment, or FOG. Each chamber shall be evaluated separately for the purposes of measurement and the requirement for evacuation.
- There is a history of non-compliance with this program.
- The discharge exceeds FOG or other pollutant levels determined by the wastewater treatment facility.

Each grease containment device, when cleaned, shall be fully evacuated and immediately put back into service. Following the cleaning, the system shall be subject to inspection. The maximum period in between cleanings may be increased or decreased based on the inspection records. This change will be denoted on the FOG permit.

Annually, the city will contact each of the FEs for inspections and permit renewal. While city is onsite, they will need access to the food preparation facility, all documentation associated with maintenance/cleaning, and the interceptor or other grease containment device.

7. Legal Requirements and Penalties:

Federal Water Pollution Control Act (Clean Water Act 33 U.S.C. 1251)

Waverly City Code. Chapter 75.10. (Conditional Uses of Sewers)

8. FOG Program Enforcement Schedule of Penalties:

a) Failure to submit FOG application or proposed grease containment equipment:

Any facility, structure or improvement or any part of such facility, structure or improvement which has been constructed, erected or installed on property in violation of a provision in this chapter shall be vacated and removed at the owner's expense, unless the city, pursuant to procedures established in the building code, of this code, grants retroactive approval of the construction, erection or installation.

SEC. 100.1.07 MINIMUM REQUIREMENTS. All requirements established pursuant to this chapter shall be considered as minimum requirements which may be exceeded, provided that all other applicable requirements of the code have not been violated.

SEC. 100.1.08 SUMMARY. Except as otherwise provided in this chapter, the use of premises and structures in the city shall be in accordance with the minimum standards hereinafter established:

1. Height Limits. No structure shall be erected, converted, enlarged, reconstructed or structurally altered to exceed the height limit herein established for the zone in which the structure is located.

In this case, there shall be a side yard on the longer street side of the corner lot of not less than fifty percent of the setback required on the lots to the rear of such corner lot, and no accessory building on said corner lot shall project beyond the setback line of the lots in the rear; provided further, that this regulation shall not be so interpreted as to reduce the buildable width of the corner lot facing an intersecting street, and of record or as shown by existing contract of purchase at the time of the effective date of the ordinance codified in this chapter, to be less than twenty-eight feet nor to prohibit the erection of an accessory building.

SEC. 100.4.08 CORNER LOTS FRONTAGE REQUIREMENTS. On corner lots, frontage may be considered on either street; provided, that if front and rear yards are parallel to the lot line having the longer dimension, then setbacks along both streets shall conform to the front yard requirement of the district in which it is located.

SEC. 100.4.09 R DISTRICT FRONT YARD REQUIREMENTS. In any R district there shall be a minimum front yard required as stated in the yard requirements for that particular district; provided, however, that where lots comprising thirty percent or more of the frontage within two hundred feet of either side lot line are developed with buildings at a different setback, the front yard setback shall be the average of these building setbacks and the minimum setbacks required for the undeveloped lots. In computing the average setback, buildings located on reversed corner lots or entirely on the rear half of lots shall not be counted. The required setback as computed herein need not exceed fifty feet in any case, nor be less than twenty feet.

SEC. 100.4.10 REDUCTION PROHIBITED. No lot shall be reduced in area so as to make any yard of any other open space less than the minimum required by this chapter. No part of a yard or other open space provided about any building or structure for the purpose of complying with the provisions of this chapter shall be included as part of a yard or other open space required under this chapter for another building or structure. Off-street parking and loading areas may occupy all or part of any required yard or open space except as otherwise specified in this chapter.

SEC. 100.4.11 BUILDING LINES ON APPROVED PLATS. Whenever the plat of a land subdivision on record in the office of the county recorder shows a setback building line along any frontage for the purpose of creating a front yard or side street yard line, the building line thus shown

shall apply along such frontage in place of any other yard line required in this chapter unless specific yard requirements in this chapter require a greater setback.

SEC. 100.4.12 PERMITS ISSUED PRIOR TO EFFECTIVE DATE - CHANGES NOT REQUIRED.

Nothing herein contained shall require any change in the overall layout, plans, construction, size, or designated use of any building or part thereof for which approvals and required building permits have been granted before the enactment of the ordinance codified in this chapter, the construction of which in conformance with such plans shall have been started prior to the effective date of the ordinance codified in this chapter and completion thereof carried on in a normal manner and not discontinued for reasons other than those beyond the builder's control.

100.4.13 Visual Barrier Standards

SEC. 100.4.13.1 Purpose: The City of Waverly recognizes the aesthetic and economic value of visual barriers between low density residential and high-density and non-residential land uses, and therefore requires minimum standards to:

- a. Establish and enhance a pleasant visual character which recognizes aesthetics and safety issues;
- b. Promote compatibility between land uses by reducing the visual, noise, and lighting impacts of specific development on users of the site and abutting uses;
- c. Unify development, and enhance and define land uses.

SEC. 100.4.13.2 When Screening Required. Screening is required between adjacent zoning districts when one or more of the following conditions in the more dense or non-residential zoning district is directly visible from and faces toward the boundary of the low density residential zoning district.

- a. Non-Residential Uses Abutting Residential Uses. Where any business, industrial, institutional, essential service, utility, or public use structure abuts property zoned or developed for residential use, said building/facility shall provide screening along the boundary of the residential property. Screening shall not be required on that side of a business, industry, or institutional building considered to be the architectural front (as determined by the code enforcement officer).
- b. Multifamily Residential Uses Abutting Single Family Residential Uses. Where multifamily dwelling unit development is to be located or altered to include items from this section, said use shall be screened when 66 feet or less from property lines zoned or developed as single family residential use.
- c. Outdoor storage areas or storage tanks, unless otherwise screened.
- d. Loading docks, refuse collection points, and other service areas.
- e. Major machinery or areas housing a manufacturing process.
- f. Major on-site traffic circulation areas or truck and/or trailer parking.
- g. Sources of glare, noise, or other environmental effects.

SEC. 100.4.13.3 Landscape/Screening Plan Required. In all instances where screening is required, a comprehensive plan shall be submitted at the time of building permit submittal and said plan shall identify all proposed screening in both plan and sectional view.

SEC. 100.4.13.4 Type of Screening Required. All screening specifically required by this section shall consist of either a fence, a greenbelt planting strip, or berming and a planting strip as provided for below:

- a. Fencing. A screening fence shall be constructed of masonry, brick or wood or similar materials to achieve said screening purpose. Such fence shall provide a solid screening effect and shall be a minimum of six (6) feet in height. The design and materials used in constructing a required screening fence shall be subject to the approval of the code enforcement officer.
 1. Fencing may be used to screen residential properties across a right-of-way 66 feet or less. Said fencing shall be no taller than three feet in height and not located within a sight triangle as defined in the Waverly City Code.
- b. Greenbelt planting strip. A planting strip shall consist of any combination of coniferous trees and deciduous trees and shall be of sufficient width and density to provide an effective visual screen at the time of planting at mature height.
 1. The width of the greenbelt planting strip shall be a minimum of 10 feet in width from the property line affected.
 2. The planting strip shall be designed to provide visual screening to achieve 75% non-transparency year round and to a minimum height of 6 feet at maturity. The grade for determining height shall be the grade elevation of the building or use for which the screening is providing protection unless otherwise established by the code enforcement officer.
 3. All greenbelt strips and buffer yards must be seeded or sodded or treated with a decorative mulch or stone except in areas of steep slopes where natural vegetation is acceptable. The 10 foot buffer strip shall be effectively mowed and maintained so that the plant material has sufficient means for continued survival. If plants utilized for visual obstruction die, they must be replaced in accordance with maintenance of landscaping guidelines in this code.
- c. Planting Strip and Berming. Earth mounding or berms may be used, with a maximum slope of two to one, in combination with deciduous plantings or coniferous plantings.
 1. Berming shall not be used to achieve more than three (3) feet of the required screen and the planting and berming combination shall achieve a total height of at least six (6) feet in height at the time of installation.
 2. Plantings, if desired on top of or in between berms, shall be planted at a height of at least three (3) feet in height to achieve a continuous visual barrier of at least six (6) feet in height, including the berm height, when plantings mature.
 3. The planting strip shall be designed to provide visual screening to achieve 75% non-transparency year round.
 4. The design of berms shall include provisions that demonstrate said berms will avoid changes with drainage conditions onto adjacent properties.
- d. Maintenance of Landscaping. Upon installation of any plant materials used for screening, the owner of the property shall take appropriate actions to ensure their continued health and maintenance and effective visual barrier is maintained. Required landscaping that is damaged shall be replaced so as to perform the intended screening requirements within 9 months of receiving notice to replace from the City.

SEC. 100.4.13.5 Exceptions. A development may continue to comply with the screening requirements in effect at the time of issuance of its original permit, regardless of whether an adjacent lot or site is subsequently rezoned to a less intensive district which would otherwise require compliance with buffer yard or screening provisions. In addition, the following general conditions shall also be exempted:

- a. Reconstruction or replacement of a lawfully existing use or structure following a casualty loss when reconstructed in the same configuration.
- b. Remodeling, rehabilitation, or improvements to existing uses or structures which do not substantially change the location of structures, parking spaces, traffic circulation or other site improvements.
- c. Additions or enlargements of existing parking lot surface areas or structures which increase impervious coverage area by less than 25 percent. Where such additions or enlargements are 25 percent or greater, these provisions shall apply only to that portion where the new development occurs adjacent to or across the street from residential zoning.
- d. Existing agricultural land uses which existed prior to the establishment of this ordinance.

5. Upon receipt of the documents and the conversion fee as provided above, the permit and development administrator or the administrator's designee shall review the building code analysis and conduct such inspections of the structure as may be deemed appropriate by the

administrator to determine whether or not the structure conforms with the requirements of paragraph (1) above. Section 100.17 PD - Planned Development District

SEC. 100.17.01 INTENT - APPLICABILITY

1. Intent. The Planned Development District is intended and designed to provide a means for the development of tracts of land on a unit basis, allowing greater flexibility and diversification of land uses and building locations than the conventional single lot method. It is the intent of this Section that basic principles of good land use planning be maintained and that sound zoning standards be utilized in implementing this Ordinance, especially concerning population density, providing adequate light and air, preserving recreation and open space and insuring appropriate building placement.
2. Uses Permitted. The “PD” district shall permit the inclusion of multiple “R” district and “C” district land uses modified into a development providing for greater flexibility of land use, transportation elements, open spaces, architectural standards, building setbacks and building locations than the individual zoning districts would permit. The district is not to be used to circumvent “R” and “C” standards, but to follow recognized principles of civic design, land use planning, and building architecture resulting in creative mixed use developments.

SEC. 100.17.02 PROCEDURE

When an application for a Planned Development District as an amendment to the Zoning Ordinance is submitted for a particular parcel development, the following procedure shall be utilized to facilitate said amendment:

1. The owner of a parcel of land comprising an area of not less than five (5) acres shall submit an application and site development plan to change the zoning of said parcel to the “PD” Zoning District Classification.
2. The application and Site Development Plan shall be submitted by the owner to the City Zoning office for review and comment. City Staff shall review the conformity of the proposed development with the standards of the Comprehensive Plan and recognized principles of civic design, land use planning and architecture and offer comments in a response to the filings. Once the application and plan are finalized, City Staff shall place the application on the agenda of the Planning and Zoning Commission for public hearing and consideration by the Commission.
3. The applicant shall present the application and Site Development Plan to the Planning and Zoning Commission. The Commission shall review the conformity of the proposed development with the

standards of the Comprehensive Plan and with recognized principles of civic design, land use planning and architecture.

4. After notice and a public hearing, the Commission may recommend approval or disapproval of the Site Development Plan and zoning petition to the City Council as submitted or require that the petitioner amend the plan to preserve the intent and purpose of this Ordinance to promote public health, safety and general welfare.
5. The Site Development Plan and zoning petition shall thereafter be placed on the agenda of the City Council with the Commission's recommendations. The City Council, after notice and public hearing, shall approve the Site Development Plan as an amendment to the Zoning Ordinance.

SEC. 100.17.03 REQUIRED DOCUMENTS – SITE DEVELOPMENT PLAN

SEC. 100.17.04 ALTERNATIVE APPROVAL PROCESS

Full development of a Site Development Plan that complies with Section 100.17.03 may involve substantial effort and financial investment without guarantee of approval. In order to determine if the Staff, Commission and Council are supportive of the Planned Development concept being proposed without completing a full Site Development Plan, the applicant may choose to use this two-step process:

1. The applicant shall submit an application for zoning change to PD District with a preliminary site plan showing the layout of streets, types of development, access drives, and a legal description of the entire property. The Commission shall consider the application for their recommendation on the rezoning of the land only. This requires a public hearing. The rezoning of the land only is then submitted to the City Council after review and recommendation by the Planning and Zoning

Commission. This requires a public hearing. The City Council only considers the zoning change. While the zoning change is preliminarily approved by this procedure, the zoning change becomes effective only upon approval of the final Site Development Plan.

2. The final Site Development Plan shall then be submitted for staff review, Commission recommendation and City Council consideration, including a second public hearing at each level, for the final approval of the Site Development Plan. The final Site Development Plan must be approved by Council as an amendment to the Zoning Ordinance before any development can occur and before construction of any public infrastructure.

SEC. 100.17.05 SITE PLAN AMENDMENTS

1. Major

Proposed major amendments shall be administratively reviewed by City planning staff. SEC. 100.27 Home Occupations

Section: 100.27.01 Purpose

1. Permit residents of the community a broad choice in the use of their homes as a place of livelihood and the production of supplementing of personal and family income.
2. Establish criteria and development standards for home occupations conducted in dwelling units and accessory structures in residential zones.
3. Protect residential areas from adverse impacts of activities associated with home occupations.
4. Regulate home occupation.

Sec. 100.27.02 Definition. Home occupation means:

1. An accessory use of a dwelling unit, involving the manufacture, provision, or sale of goods and/or services, which is conducted by members of the family residing on the premises plus no more than one nonresident assistant or employee and carried on only within the enclosed living area of the dwelling unit.
2. Home occupations do not include garages sales and yard sales nor home parties which are held for the purpose of the sale or distribution of goods or services. Provided, however, that if the collective total of all such sales and/or parties exceeds six in any calendar year such sales and/or parties shall be considered home occupations

Home occupations do not include in-home childcare.

Sec. 100.27.03 Generally. The regulations set forth in this ordinance shall apply to all residential dwelling units, irrespective of zoning district.

Sec. 100.27.04 Criteria. All home occupations shall meet the following criteria:

1. A home occupation shall be conducted in a manner which does not give an outward appearance of nor manifest characteristics of a business which would infringe upon the right of neighboring residents to enjoy the peaceful occupancy of their dwelling units or infringe upon or change the intent of the residential zone. There shall not be outside storage nor window display. Noise, dust, odor, noxious fumes, or vibrations emanating from the premises shall not exceed that which is normally produced by a single dwelling unit. Mechanical or electronic equipment which is incidental to the home occupation may be used provided it does not create visible or audible interference in radio or television receivers or cause fluctuations in line voltage off the premises. The home occupation shall not interfere with the delivery of utilities or other services to the area.
2. The home occupation should not generate significantly greater traffic volume than would normally be expected in the particular residential zone in which the home occupation is conducted. General delivery and pick-up of materials or commodities to and from the premises by a commercial vehicle should not exceed two trips per year. A commercial vehicle for the purpose of this section and chapter is any motor vehicle having a gross vehicle weight of more than 14,000 pounds.

3. The parking of customers' or clients' vehicles should not create safety hazards or unusual congestion. At any one time only one commercial vehicle associated with the activities of the home occupation may be parked on the street near the premises for more than four consecutive hours. One additional on-site parking space shall be required above the normal parking requirements for the dwelling unit for any home occupations where students or clients are likely to concurrently visit the premises and their method of transportation are two or more separate motor vehicles.
4. The home occupation is to be conducted only by members of the family residing in the dwelling unit plus not more than one nonresident assistant or employee. Persons engaged in building trades, sales or similar fields, using their dwelling units or residential premises as an office for business activities carried on or off the premises, may have more employees than the limitations set forth in subsection (4) of this section if they are not employed on the premises. One additional on-site parking space shall be required above the normal parking requirements for the dwelling unit for any home occupations where a nonresident employee works on the premises and that particular employee's method of transportation to and from the site for the home occupations is a motor vehicle which would normally be parked on or near the site of the new occupation.
5. Only one flush-mounted wall sign, not over two square feet in area, is permitted per dwelling unit. The legend shall show only the name of the occupant and type of occupation. The sign shall not be illuminated. A permit for the sign is not required.
6. If the home occupation is the type in which classes are held or instruction given, there shall be no more than four students or pupils in the dwelling unit or on the premises at any one time. These requirements limiting class size shall not be construed to prohibit occasional exceptions for events such as recitals, demonstrations, and other similar gatherings.
7. If the home occupation is the type in which customers or clients visit the premises there shall be no more than six clients or customers in the dwelling unit or on the premises during any period of 60 consecutive minutes. Motor vehicle traffic generated by clients or customers of a home occupation shall be prohibited from visiting the premises between the hours of 10:00 p.m. and 7:00 a.m. Motor vehicle traffic associated with clients or customers coming to or going from the premises shall be limited to a total of no more than four vehicles during any period of 60 consecutive minutes; provided, however the City may approve up to six such vehicles during any period of 60 consecutive minutes after having considered the availability of on-site parking, traffic circulation in the neighborhood, and the hours during which the home occupation are conducted. The requirements of this subsection shall not be construed to prohibit occasional exceptions for such events as meetings, conferences, demonstrations, or other similar gatherings of the time constraints contained in this subsection.
8. The total number of home occupations conducted within a dwelling unit is not limited, except that the cumulative impact of all home occupations conducted within the dwelling unit or on the premises thereof shall not be greater than the impact of one home occupation.
9. Home occupations shall comply with all local, state, or federal regulations pertinent to the activity pursued, and the requirements of or permission granted by this chapter shall not be construed as an exemption from such regulations.
10. Abatement. A nonconforming home occupation existing at the time this ordinance is adopted shall be nonconforming. Said home occupations may remain but cannot be reinstated once original owner has ended the operation nor can an ownership be transferred.

11. Home occupations shall be limited to 25% of the enclosed living area of the dwelling unit not to exceed 300 square feet.

Section 100.27.05 Procedure.

1. **Application.** Application for a home occupation permit shall be made to the Zoning Manager and/or Building Official on a form provided by the department and shall be accompanied by the prevailing filing fee as established by resolution of the City Council. The Zoning Manager and/or Building Official will make a decision and notify the applicant in writing within 15 calendar days of the date the application is received.
2. **Scope.** In cases where the Zoning and/or Building Department considers the application not within the scope of the home occupation criteria, the application will be denied.
3. **Time Limit.** All home occupation permits shall be valid for a period of one year from initial date of approval.
4. **Voiding of Permit.** The Zoning and/or Building Department may void any home occupation permit for noncompliance with the criteria set forth in this ordinance. Revocation may take place at any time prior to the expiration date of the permit. If the permit is revoked or is not renewed, it becomes null and void, and said use shall be terminated.
5. **Appeal to the Board of Adjustment.** The decision of the Zoning Manager and/or Building Official concerning approval or revocation shall be final unless a written appeal is filed with the Board of Adjustment within ten (10) calendar days of the decision.
6. **Inspection.** Home occupation applicants shall permit a reasonable inspection of the premises by the Zoning Manager and/or Building Official to determine compliance with this ordinance. Home occupation shall be field-checked annually by staff to determine compliance.
7. **Renewal.** Home occupation permits may be renewed annually provided there has not been any violation of the provisions of this ordinance. Requests for renewals shall be submitted to the Zoning and/or Building Department in writing, accompanied by the prevailing renewal fee, as established by City Council resolution, one month prior to expiration of the permit.

Section 100.27.06 Enforcement Procedures.

1. Any aggrieved person believing that a violation or violations of this ordinance are occurring and who desires that action be taken by the City shall notify the Zoning and/or Building Department in writing of such alleged violation(s). Within 30 calendar days after receipt by the Zoning Manager and/or Building Official of such written allegation(s), the Zoning Manager and/or Building Official shall complete an investigation of the alleged allegation(s) to determine the merits thereof. Within 10 calendar days after the Zoning Manager and/or Building Official completed the investigation(s), he shall notify in writing the following persons:
 - a. If the Zoning Manager and/or Building Official determines that no violation as alleged or otherwise is occurring, then notification of that decision shall be given to the complaining person or a spokesperson for complaining person by certified mail return requested.

- b. If the Zoning Manager and/or Building Official determines that a violation is occurring or has occurred as alleged, then notification of that decision and a time for compliance shall be sent by certified mail return requested to both the violator and complaining person or a spokesperson for complaining person. The notification shall also state what action, if any, will be taken if compliance is not timely effected.
2. Any person feeling aggrieved by a decision of the Zoning Manager and/or Building Official may appeal that decision to the Board of Adjustment by filing a written notice of appeal in the office of the Zoning Manager and/or Building Official within 30 days from the date of the decision that is appealed.

Section 100.28 Alternative Energy System Requirements Section A. Purpose:
(Amended by Ordinance 1121, published 03/28/2023)

Section A. Purpose:

It is the purpose of this regulation to promote the safe, effective, and efficient use of small alternative energy systems installed to reduce on-site consumption of utility supplied services to residences and businesses in the City of Waverly.

Section B. Findings:

The City of Waverly finds that solar, small wind, and geothermal energy is abundant, renewable, and nonpolluting energy resources and that its conversion to electricity will reduce our dependence on nonrenewable energy resources and decrease the air and water pollution that results from the use of conventional energy sources. Alternative energy has the potential to reduce peak power demands and help diversify the State's energy supply portfolio.

Section C. Definitions:

1. **Alternative energy system:** An energy system that generates electrical power or heat management by the means of wind, solar, or geothermal energy.
2. **Building-integrated solar energy system:** A solar energy system that is an integral part of a building, rather than a separate mechanical device, replacing, or substituting for an architectural or structural component of the building including, but not limited to, photovoltaic or hot water solar systems contained within roofing materials, windows, skylights, and awnings.
3. **Closed loop ground source heat pump system:** a system that circulates a heat transfer fluid, typically food-grade antifreeze, through pipes or coils buried beneath the land surface or anchored to the bottom in a body of water.
4. **Extended tower height:** The height above grade to a propeller's tip at its highest point of rotation.
5. **Ground-mounted solar energy system:** Solar energy system that is free standing and is not supported by any building, accessory, or dwelling. For the purposes of this section, solar powered lights used to illuminate exterior areas shall not be included in this definition.
6. **Ground source heat pump system:** A system that uses the relatively constant temperature of the earth or a body of water to provide heating in the winter and cooling in the summer. System components include open or closed loops of pipe, coils, or plates, a fluid that absorbs and transfers heat; and a heat pump unit that processes heat for use or disperses heat for cooling; and an air distribution system.

7. **Heat transfer fluid:** a non-toxic and food grade fluid such as potable water, aqueous solutions of propylene glycol not to exceed 20% by weight or aqueous solutions of potassium acetate not to exceed 20% by weight.
8. **Horizontal wind energy system:** A small wind energy system that rotates around a horizontal axis.
9. **Open loop ground source heat pump system:** a system that uses groundwater as a heat transfer fluid by drawing groundwater from a well to a heat pump and then discharging the water over land, directly in a water body or into an injection well.
10. **Passive solar energy system:** A system that captures solar light or heat without transforming it to another form of energy or transferring the energy via a heat exchanger.
11. **Roof-mounted solar energy system:** A roof mounted solar energy system mounted directly abutting the roof.
12. **Small Wind Energy System:** A small wind energy conversion system may consist of a small wind turbine on a tower or a roof-mountable small wind turbine unit, and associated control or conversion electronics, which supplies power solely for onsite use with the primary purpose of reducing on-site consumption of power.
13. **Solar energy system:** A device or structural design feature, a substantial purpose of which is to provide daylight for interior lighting or provide for the collection, storage and distribution of solar energy for space heating or cooling, electricity generation or water heating.
14. **Tower height:** The height above grade of the fixed portion of the tower, excluding the small wind turbine itself.
15. **Vertical Small Wind Energy System:** A Small Wind Energy System that rotates around a vertical axis.

Section D. Permit Process:

Alternative energy systems shall require plans to be approved by the zoning official through a permit procedure as outlined in the City Code and shall be permitted to be applied for in residential, commercial, and industrial zoning classifications, where structures of any sort are allowed and subject to all applicable conditions of this section and all general requirements specified for any such use or structure identified in this Section. Plan approval does not indicate compliance with building or electrical codes. Building and electrical permits must be issued through Bremer County Zoning.

1. Permitted Uses. The following shall be considered permitted uses or structures, subject to all applicable conditions, described in this section and all general requirements specified for any such use or structure identified with such use. Any of the proposed uses below shall be reviewed and approved by the zoning official if the proposed use meets all requirements. If a proposed use does not meet all requirements, or an exception is requested, the use shall be considered a special provisional use.
 - a. Passive Solar Energy System
 - b. Building Integrated Solar Energy System
 - c. Closed Loop Ground Source Heat Pump System
 - d. Open Loop Ground Source Heat Pump System
 - e. Roof-Mounted Solar Energy System

2. **Special Provisional Uses.** Special provisional uses, require a review and recommendation of the Planning and Zoning Commission to the Board of Adjustment which will determine approval of the use subject to all applicable conditions of this section and all general requirements specified for any such use or structure identified with such use. The following uses and structures shall require special provisional use approval in compliance with all applicable conditions, described in this section and all general requirements specified for any such use or structure identified with such use:
 - a. Small Wind Energy System
 - b. Ground-Mounted Solar Energy System
3. **Public Hearing.** During the consideration of a special provisional use, the Planning and Zoning Commission shall hold a public hearing with the same requirements as Section 100.24.03. This shall include the notification of all property owners within 250 feet. After conducting the public hearing, the Commission shall forward its recommendation for action to the Board of Adjustment for decision. A request of waiver for the public notification requirements may be submitted to the City Administrator for uses that may require anonymity.
4. **Energy Production.** The sum of all alternative energy systems capacity ratings shall not exceed the average annual consumption on the property, utilizing information from the prior calendar year.
5. **Code Compliance.** Applications that meet the design requirements of this ordinance, and do not require a special use permit, shall be granted administrative approval by the zoning official. Plan approval does not indicate compliance with Building Code, Electric Code or Plumbing Code. Building and electrical permits must be issued through Bremer County Zoning.

Section E. Small Wind Energy System:

1. **Lot Size:** No Small Wind Energy System shall be allowed on any lot containing less than two acres.
2. **Height and Set-Back:** The base of the small wind energy system shall be set back from all property lines, public right of ways, and above ground public utility lines at a distance no closer than 110% of the total extended height of the tower. Guywires which support the tower, if applicable, shall be allowed at a distance no closer than the zoning district setbacks. No tower should exceed height limitations as imposed by FAA regulations.
3. **Noise:** Small wind energy systems shall not exceed 60 dBA, as measured at the property line. The level, however, may be exceeded during short-term events such as utility outages and/or severe windstorms.
4. **Aesthetics:** All small wind energy systems shall use colors that blend with the sky or have low visual impact on the surrounding area. No reflective materials can be used.
5. **Wind Turbines:** Building permit applications for small wind energy systems shall be accompanied by documentation showing that the small wind turbine is approved by any small wind certification program recognized by the American Wind Energy Association. (AWEA)
6. **Compliance with International Building Code:** Building permit applications for small wind energy systems shall be accompanied by standard drawings of the small wind turbine structure, including the tower, base, and footings. For roof-mounted applications, standard

drawings showing the capability of a roof to support such a proposal shall be submitted for review. An engineering analysis of the tower showing compliance with the International Building Code and certified by a licensed professional engineer shall also be submitted. This analysis is frequently supplied by the manufacturer. Wet stamps shall not be required.

7. **Compliance with FAA Regulations:** Small wind energy systems must comply with applicable FAA regulations, including any necessary approvals for installations close to airports and the Airport Tall Structure Zoning section in the City Code. Required documents, if applicable, shall be submitted to the City at the time of application.
8. **Compliance with National Electric Code:** Building permit applications for small wind energy systems shall be accompanied by a line drawing of the electrical components in sufficient detail to allow for a determination that the manner of installation conforms to the National Electrical Code.
9. **Utility Notification:** No small wind energy system shall be installed until evidence has been given that the electric utility provider has been informed of the customer's intent to install an interconnected customer-owned generator and the customer can show proof that they have received, understand, and agree to abide by the utility's requirements for net metering and distributed generation installation. A disconnect will be required at the time of installation and the utility company shall be notified of this installation. A written statement from the electric utility provider shall be presented at the time of applying for a construction building permit showing compliance with the disconnect requirement. Off-grid systems shall be exempt from this requirement and a statement from the utility company recognizing the off-grid status is required to be presented at time of application.
10. **Vertical Small Wind Energy System:** Because of the range of motion and lower required height, vertical small wind energy systems require special attention. Vertical systems will be reviewed as a special provisional use.
11. **Requirement for engineered drawings/approval and soil studies:** A small wind energy system of less than 20kW, or a small wind energy system mounted on a structure other than a free-standing tower, shall not be erected in the City of Waverly, unless the plans and specifications for the system have received the stamped approval of an Iowa registered engineer. In lieu of obtaining the stamped approval of an Iowa registered engineer for each small wind energy system of 20kW or less mounted on a free standing tower, a manufacturer may submit its standard plans and specifications for a 20 kW system on a free-standing tower, including its soils study and foundation plans for such system, for a one time review and stamped approval by an Iowa registered engineer as suitable for construction in any soil condition that exists in the State of Iowa. If such one-time stamped approval is obtained, that manufacturer may thereafter construct such small wind energy systems of 20 kW or less in the City of Waverly, utilizing the approved soils study and foundation plans for the 20 kW small wind energy system, without obtaining and presenting the stamped approval of an Iowa registered engineer for each such installation.
12. **Insurance:** A person seeking a building permit to erect a small wind energy system shall provide evidence, in the form of a certificate of insurance satisfactory to the City of Waverly, showing general liability insurance coverage for the installation and operation of the system under a standard homeowner's or standard business owner's insurance policy, separate and distinct from any insurance requirements from the electric utility provider.
13. **Safety Requirements:** In addition to meeting all applicable building code requirements, to limit climbing access to the tower, applicant must demonstrate a method such as erecting a fence six (6) feet in height with a locking portal or installing an anti-climbing device or utilization of an equivalent method will be installed prior to final approval by the building inspector. Also climbing foot pegs or rungs below 12 feet above grade must be removed.

14. **Blade Clearance:** No Portion of the small wind energy system blade sweep shall extend within thirty (30) feet of the ground. No blade sweep may extend over public parking areas, driveways or sidewalks.
15. **Automatic Over Speed Controls:** All small wind energy systems shall be equipped with manual (electronic or mechanical) and automatic over speed controls to limit the blade rotation speed to within the design limits of the small wind energy system. Turbine/blade systems shall be rated to wind speeds of no less than 90 miles per hour, measured at sea level.
16. **Minimal Interference Requirements:** The small wind system operation shall not cause interference to the radio and television reception on adjoining property.
17. **Shadow Flicker:** Small wind energy systems shall avoid shadow flicker resulting from the shadow cast from the small wind energy system onto adjacent properties.
18. **Ice Shedding:** The small wind energy system owner shall ensure that ice from the wind turbine blades does not impact any off-site property. Compliance with this requirement in the form of a plan or specifications showing compliance with this provision shall be indicated in the plans and specifications submitted with the plans and application.
19. **General Requirements on Operation:** The owner of a small wind energy system shall defend, indemnify, and hold harmless the City of Waverly, and their officials from and against any and all claims, demands, losses, suits, causes of action, damages, injuries, costs, expenses, and liabilities whatsoever including attorney fees arising out of the actions or omissions of the operator or the operator's contractors concerning the construction or operation of the small wind energy facility without limitation, whether said liability is premised on contract or tort. Owner's submittal for a building permit for a small wind energy system shall constitute agreement to defend, indemnify, and hold harmless the City of Waverly and their officials.
20. **Signage:** No signs, other than appropriate warning signs, or standard manufacturer's or installer's identification signage shall be displayed on a small wind generator, tower, building, or other structure associated with a small wind energy system.
21. **Lighting:** No illumination of the turbine or tower shall be allowed unless required by the FAA.
22. **Maintenance:** All small wind energy facilities shall be maintained in operational condition at all times, subject to reasonable maintenance and repair outages. Operational condition includes meeting all of the requirements in this section and permit conditions for a continuous 12-month period.
 - a. **Notice of Abandonment:** The Zoning Official may issue a Notice of Abandonment (Notice) to the owner of a small wind energy system that is deemed not meeting the requirements or conditions associated with the small wind energy system for a continuous 12-month period. The owner shall have the right to respond to the Notice within 30 days from receipt date. The Zoning Official shall withdraw the Notice and notify the owner that the Notice has been withdrawn should the owner provide information that demonstrates the small wind energy system has not been abandoned.
 - b. **Removal:** If the small wind energy system is determined to be abandoned, the owner, at their sole expense, shall restore site to original condition and foundation shall be removed up to 5 feet below final grade and vegetation restored within 120 days. This determination shall include the requirements or conditions associated with the small wind energy system not being met for a continuous 12-month period.

Section F. Solar Energy System:

1. **System Type:** Passive or building-integrated solar energy systems are exempt from the requirements of this section and shall be regarded as any other building element. Roof-mounted solar energy systems shall be reviewed and approved by the zoning official if the proposed

structure meets all requirements of this code chapter. Ground-mounted solar energy systems require approval through a special provisional use procedure described in this section.

2. **Height:** Roof-mounted solar energy systems in residential applications shall not be higher than 10 inches above the roof at any point. Non-residential flat roof mounted system applications are exempt from this height requirement. Ground-mounted solar energy systems in residential applications shall not exceed 15 feet in height from grade at total extended height. Ground-mounted solar energy systems in non-residential applications are exempt from this height requirement.
3. **Location:** The locations of ground mounted systems are limited to the rear of the property and should avoid being in eyesight from the street. Roof-mounted systems must be placed on rear or side-facing roofs, which do not front any public street, unless documentation can be shown that such locations would be ineffective or impractical.
4. **Setbacks:** Ground-mounted solar energy systems shall meet all set back requirements for the applicable zoning district for accessory structures. Roof-mounted systems shall meet all set back requirements for the applicable zoning district and shall not extend beyond the exterior perimeter of the building on which the system is mounted.
5. **Easements:** Solar energy systems shall not encroach on any platted public easement.
6. **Screening:** Solar energy systems shall be screened from street view to the extent possible without reducing their efficiency. The applicant shall submit a landscaping plan subject to The City of Waverly staff review at the time of application.
7. **Aesthetics:** All solar energy systems shall use colors that blend with the surrounding settings. Reflection angles from collector surfaces shall be oriented away from neighboring windows.
8. **Maximum Area of unit:** Ground-mounted solar energy systems shall be treated as an accessory structure and thus are limited in area to the accessory structure limitations as set by the City Code. The total size of all solar energy systems may not produce any amount of energy, addition to other alternative energy systems beyond the average annual consumption.
9. **Compliance with International Building Code:** Building permit applications for ground-mounted solar energy systems shall be accompanied by standard drawings of the solar energy system structure, including the panels, base, and footings. For roof-mounted applications, standard drawings showing the capability of a roof to support such a proposal shall be submitted for review. An engineering analysis of the system showing compliance with the International Building Code and certified by a licensed professional engineer shall also be submitted. This analysis is frequently supplied by the manufacturer. Wet stamps shall not be required.
10. **Compliance with Federal Regulations:** Solar energy systems must comply with applicable Federal regulations. Required documents, if applicable, shall be submitted to the City at the time of application.
11. **Compliance with National Electric Code:** Building permit applications for solar energy systems shall be accompanied by a line drawing of the electrical components in sufficient detail to allow for a determination that the manner of installation conforms to the National Electrical Code
12. **Utility Notification:** No solar energy system shall be installed until evidence has been given that the electric utility provider has been informed of the customer's intent to install an interconnected customer-owned generator and the customer can show proof that they have received, understand, and agree to abide by the utility's requirements for net metering and distributed generation installation. A disconnect will be required at the time of installation and the electric utility provider shall be notified of this installation. A written statement from the utility company shall be presented at the time of applying for a construction building permit showing

compliance with the disconnect requirement. Off-grid systems shall be exempt from this requirement.

13. **Safety:** Feeder lines, Utility connects, and any other feature shall have appropriate markings, warnings, and safety features to prevent harm to persons, wildlife, or personal property.
14. **General Requirements on Operation:** The owner of a solar energy system shall defend, indemnify, and hold harmless the City of Waverly and their officials from and against any and all claims, demands, losses, suits, causes of action, damages, injuries, costs, expenses, and liabilities whatsoever including attorney fees arising out of the actions or omissions of the operator or the operator's contractors concerning the construction or operation of the solar energy facility without limitation, whether said liability is premised on contract or tort. Owner's submittal for a building permit for a solar energy system shall constitute agreement to defend, indemnify, and hold harmless the City of Waverly and their officials.
15. **Maintenance:** All solar energy facilities shall be maintained in operational condition at all times, subject to reasonable maintenance and repair outages. Operational condition includes meeting all of the requirements in this section and permit conditions for a continuous 12-month period.
 - a. **Notice of Abandonment:** The Zoning Official may issue a Notice of Abandonment (Notice) to the owner of a solar energy system that is deemed not meeting the requirements or conditions associated with the solar energy system for a continuous 12-month period. The owner shall have the right to respond to the Notice within 30 days from receipt date. The Zoning Official shall withdraw the Notice and notify the owner that the Notice has been withdrawn should the owner provide satisfactory information that demonstrates the solar energy system has not been abandoned.
 - b. **Removal:** If the solar energy system is determined to be abandoned, the owner, at their sole expense, shall restore site to original condition and foundation shall be removed up to 5 feet below final grade and vegetation restored within 120 days. This determination shall include the requirements or conditions associated with the solar energy system not being met for a continuous 12-month period.

Section G. Ground Source Heat Pump Systems:

1. **System type:** Closed loop ground source heat pump systems utilizing heat transfer fluids in residential applications are permitted subject to all applicable conditions described in this section. Open loop ground source heat pump systems are permitted only in non-residential applications and require approval through the Public Works Department subject to all applicable conditions described in this section.
2. **Setbacks:** All components of ground source heat pump systems including pumps, borings, and loops shall be set back at least 5 feet from interior side lot lines and at least 10 feet from rear lot lines. All components above ground must also meet setback requirements for the applicable zoning district. Ground source heat pump systems shall not encroach on any public easement.
3. **Safety:** For open loop ground source heat pumps, all components must contain safety devices that will protect persons, wildlife, and public property from any type of damage.
4. **Groundwater Testing:** Building permit applications for open loop ground source heat pump systems shall be accompanied by documentation of ground water quality test results that fulfill the needs of The City Public Works Department for inspection. Prior to permit approval, follow up tests are to take place and given to the City Public Works Department upon completion of the installation of the system to ensure water quality of the groundwater aquifer. The City may conduct follow up tests at the site as needed to ensure water quality of the groundwater aquifer.
5. **Compliance with International Building Code:** Building permit applications for ground source heat pump systems shall be accompanied by standard drawings of the total energy system structure, including the pumps, borings, and loops. An engineering analysis of the

system showing compliance with the International Building Code and certified by a licensed professional engineer shall also be submitted. This analysis is frequently supplied by the manufacturer. Wet stamps shall not be required.

6. **Compliance with Federal and State Regulations:** Ground source heat pump systems must comply with applicable federal and state regulations. Required documents, if applicable, shall be submitted to the City at the time of application.
7. **Compliance with National Electric Code:** Building permit applications for ground source heat pump systems shall be accompanied by a line drawing of the electrical components in sufficient detail to allow for a determination that the manner of installation conforms to the National Electrical Code.
8. **General Requirements on Operation:** The owner of a ground source heat energy system shall defend, indemnify, and hold harmless the City of Waverly and their officials from and against any and all claims, demands, losses, suits, causes of action, damages, injuries, costs, expenses, and liabilities whatsoever including attorney fees arising out of the actions or omissions of the operator or the operator's contractors concerning the construction or operation of the ground source heat energy facility without limitation, whether said liability is premised on contract or tort. Owner's submittal for a building permit for a ground source heat energy system shall constitute agreement to defend, indemnify, and hold harmless the City of Waverly and their officials.
7. **Maintenance:** All open loop ground-source heat pump facilities shall be maintained in operational condition at all times, subject to reasonable maintenance and repair outages. Operational condition includes meeting all the requirements in this section and permit conditions for a continuous 12-month period.
 - a. **Notice of Abandonment:** The City of Waverly may issue a Notice of Abandonment (Notice) to the owner of an open loop ground source heat pump system that is deemed not meeting the provisions associated with the open loop ground source heat pump system for a continuous 12-month period. The owner shall have the right to respond to the Notice within 30 days from receipt date. The City of Waverly shall withdraw the Notice and notify the owner that the Notice has been withdrawn should the owner provide information that demonstrates the system has not been abandoned and is in compliance with all applicable regulations.
 - b. **Removal:** If the open loop ground source heat pump system is determined to be abandoned, the owner, at their sole expense, shall restore site to original condition. To complete the removal of said system, the owner must remove the heat pump and any external mechanical equipment; fill pipes and coils with grout to displace heat transfer fluid. The heat transfer fluid must be removed from site and be disposed of in accordance with applicable regulations, documentation is required for removal. A final ground water quality test must be taken to ensure protection of ground water. Any piping or coiling 5 feet or less from the surface shall be removed. Removal and vegetation must be restored on site in 120 days from date of the determination of abandonment. This determination shall include the requirements or conditions associated with the open loop ground source heat system not being met for a continuous 12-month period.

 - b. No structure shall exceed one hundred fifty (150) feet above the established airport elevation in the horizontal zone as depicted on the Waverly Municipal Airport Height Zoning Map.
2. Conical Zone. The land lying under a surface extending outward and upward from the periphery of the horizontal surface at a slope of 20 to 1 for a horizontal distance of four thousand (4,000) feet. No structure shall penetrate the conical surface in the conical zone, as depicted on the Waverly Municipal Airport Height Zoning Map.
3. Approach Zone. The land lying under a surface longitudinally centered on the extended runway centerline and extending outward and upward from each end of the primary surface, as follows:
 - a. The inner edge of the approach surface is:
 - (1) Five hundred (500) feet wide for runway 18 and 36
 - (2) Two hundred fifty (250) feet wide for runway 11 and 29

SEC. 101.4.01 USE RESTRICTIONS. Notwithstanding any other provisions of Chapter 101.3, no use may be made of land or water within the City of Waverly or Bremer County in such a manner as to interfere with the operation of any airborne aircraft. The following special requirements shall apply to each permitted use.

1. All lights or illumination used in conjunction with street, parking, signs or use of land and structures shall be arranged and operated in such a manner that it is not misleading or dangerous to aircraft operating from the Waverly Municipal Airport or in the vicinity thereof.
2. No operations from any use within three (3) statute miles of any usable runway of the Waverly Municipal Airport shall produce smoke, glare or other visual effects that are hazardous or dangerous to aircraft operating from the Waverly Municipal Airport.
3. No operations from any use in the City of Waverly or Bremer County shall produce electronic interference with navigation signals or radio communication between the airport and aircraft.

SEC. 101.4.02 LIGHTING.

Section 101.5 Administration

SEC. 101.5.01 VARIANCES. Any person desiring to erect or increase the height of any structure, or to permit the growth of any tree, or otherwise use the property in violation of any section of this chapter, may apply to the board of adjustments for variance from such regulations. No application for variance to the requirements of this chapter may be considered by the board of adjustments unless a copy of the application has been submitted to the city administrator for an opinion as to the aeronautical effects of such a variance. If the city administrator does not respond to the board of adjustments within thirty (30) days from receipt a decision to grant or deny the variance, the board may make its decision to grant or deny the variance.

SEC. 101.5.02 BOARD OF ADJUSTMENTS.

1. For purposes of this chapter the board of adjustments shall be the established city zoning board of adjustments or the Bremer County zoning board of adjustments and shall exercise the following powers:

CHAPTER 102

FLOOD PLAIN MANAGEMENT

Sections:

102.1	Statutory Authorization, Finding of Fact and Purpose.
102.2	General Provisions.
102.3	Definitions.
102.4	Establishment of Zoning Districts.
102.5	Floodway (Overlay) District (FW).
102.6	Floodway Fringe (Overlay) District (FF).
102.7	General Flood Plain (Overlay) District (FP).
102.8	Shallow Flooding (Overlay) District (SF).
102.9	Administration.
102.10	Nonconforming Uses.

Section 102.1 Statutory Authorization. Finding of Fact and Purpose

SEC. 102.1.01 STATUTORY AUTHORIZATION. The legislature of the State of Iowa has in Chapter 414, of the current Code of Iowa, as amended, delegates the responsibility to cities to enact zoning regulations to secure safety from flood and to promote health and the general welfare.

SEC. 102.1.02 FINDINGS OF FACT.

1. Flood Hazard Areas. The flood hazard areas of the city are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base; all of which adversely affect the health, safety, and general welfare of the community.
2. Cause. These losses, hazards and related effects are caused by the occupancy of flood hazards and related effects are caused by the occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flood and the cumulative effect of flood plain construction on flood flows, which causes increases in flood heights and flood water velocities.
3. Engineering Methodology. This chapter relies upon engineering methodology for analyzing flood hazards which is consistent with the standards established by the Department of Natural Resources. This methodology consists of a series of interrelated steps including:
 - a. Flood Magnitudes. Determination of flood magnitudes and the corresponding flood frequencies by statistical and engineering factors as expected frequency of occurrence, area inundated, and depth of inundation.

- b. Water Surface Profiles. Calculations of water surface profiles based upon a hydraulic engineering analysis of the capability of the stream channel and overbank areas to convey flood flows.
- c. Floodway. Computation and delineation of a floodway, an area which must be reserved (no obstructions) for conveyance of flood flows so that flood heights and velocities will not be substantially increased by future encroachment on the flood plain.

SEC. 102.1.03 STATEMENT OF PURPOSE. It is the purpose of this chapter to promote the public health, safety and general welfare by minimizing those flood losses described in Section 102.1.02 with provisions designed to:

1. Reserve Area. Reserve sufficient flood plain area for the conveyance of flood flows so that flood heights and velocities will not be increased substantially.
2. Dangerous Area. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.
3. Vulnerable Uses. Require that uses vulnerable to floods, including public utilities which serve such uses, be protected against flood damage at the time of initial construction.
4. Buying Lands. Protect individuals from buying lands which are unsuited for intended purposes because of flood hazard.
5. Flood Insurance. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

Section 102.2 General Provisions

SEC. 102.2.01 LANDS TO WHICH CODE CHAPTER APPLIES. This chapter shall apply to all lands within the jurisdiction of the City of Waverly on the Flood Insurance Rate map to be within the base flood boundaries.

SEC. 102.2.02 ESTABLISHMENT OF OFFICIAL FLOOD PLAIN ZONING MAP.

1. Adoption. The Flood Insurance Rate Map (FIRM) Panels 19017C0175E, 0260E, 0276E, 0277E, 0278E, 0279E, and 0285E and 285 prepared as part of the flood insurance study for Bremer County and Incorporated Areas, and the City of Waverly dated January 29, 2021 are hereby adopted by reference and declared to be the official Flood Plain Zoning Map.
2. Flood Profiles. The flood profiles and all explanatory material contained with the Flood Insurance Study and the Flood Insurance Rate Map(s) are also declared to be a part of this chapter.
3. Dry Run. For that area of the dry run reach west of Twelfth (12th) Street Northwest, information and technical data established in the Dry Run Creek Drainage and Flood Control Study January, 1980, shall be used to determine accurate flood plain zoning and said technical data and mapping shall supersede the Flood Insurance Rate Map described above for purposes of enforcement of this chapter.

SEC. 102.2.03 RULES FOR INTERPRETATION OF DISTRICT BOUNDARIES. The boundaries of the zoning district shall be determined by scaling distances on the "Official Flood Plain Zoning Map." Where interpretation is needed as to the exact location of the boundaries of the district as shown on the Official Flood Plain Zoning Map, the administrator shall make the necessary interpretation. The person contesting the location of the district boundary shall be given a reasonable opportunity to present their case and submit technical evidence.

SEC. 102.2.04 COMPLIANCE. No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this chapter and other applicable regulations which apply to uses within the jurisdiction of this chapter.

SEC. 102.2.05 ABROGATION AND GREATER RESTRICTIONS. It is not intended by this chapter to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this chapter imposes greater restrictions, the provision of this chapter shall prevail. All other ordinances, resolutions or regulations inconsistent with this code chapter are hereby repealed to the extent of the inconsistency only.

SEC. 102.2.06 INTERPRETATION. In their interpretation and application, the provisions of this chapter shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by state statutes.

SEC. 102.2.07 WARNING AND DISCLAIMER OF LIABILITY. The degree of flood protection required by this chapter is considered reasonable for regulatory purposes and is based on engineering and scientific methods of study. Larger floods may occur on rare occasions. Flood heights may be increased by man-made or natural causes, such as ice jams and bridge openings restricted by debris. This chapter does not imply areas outside the flood plain districts or land uses permitted within such districts will be free from flooding or flood damage. This chapter shall not create liability on the part of the City of Waverly or any officer or employee thereof for any flood damages that result from reliance on this chapter or any administrative decision lawfully made thereunder.

SEC. 102.2.08 SEVERABILITY. If any section, clause, provision or portion of this chapter is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this chapter shall not be affected thereby.

Alternate methods of elevating such as piers may be allowed, subject to favorable consideration by the board of adjustment and issuance of a conditional use permit, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding. All new residential buildings shall be provided with a means of access which will be passable by wheeled vehicles during the 100 year flood.
3. Nonresidential Buildings.

The board of adjustment shall hear and decide: applications for conditional uses upon which the board is authorized to pass under this chapter, appeals and requests for variances to the provisions of this chapter, and shall take any other action which is required of the board.

2. Conditional Uses. Requests for conditional uses shall be submitted to the administrator, who shall forward such to the board of adjustment for consideration. Such requests shall include information ordinarily submitted with applications as well as any additional information deemed necessary by the board of adjustment.
3. Appeals.
 - a. Error. Where it is alleged there is any error in any order, requirement, decision, or determination made by the administrator in the enforcement or administration of this chapter, the aggrieved party may appeal such action.
 - b. Procedure. The notice of appeal shall be filed with the board of adjustment and with the official from whom the appeal is taken and shall set forth the specific reason for the appeal. The official from whom the appeal is taken shall transmit to the board of adjustment all the papers constituting the record upon which the action appealed from was taken.
4. Variances. The board of adjustment may authorize upon request in specific cases such variances from the terms of this chapter that will not be contrary to the public interest, where owing to special conditions a literal enforcement of the provisions of this chapter will result in unnecessary hardship. Variances granted must meet the following applicable standards:
 - a. One Hundred Year Flood. No variance shall be granted for any development within the floodway district which would result in any increase in floods during the occurrence of the base flood. Consideration of the effects of any development on flood levels shall be based upon the assumption that an equal degree of development would be allowed for similarly situated lands.
 - b. Cause. Variances shall only be granted upon: a showing of good and sufficient cause, a determination that failure to grant the variance would result in exceptional hardship to the applicant; and a determination that the granting of the variance will not result in increased flood heights, additional threats to public expense, create nuisances, cause fraud on or victimization of the public.
 - c. Minimum Necessary. Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
 - d. Below minimum. In cases where the variance involves lower level of flood protection for buildings than what is ordinarily required by this code chapter, the applicant shall be notified in writing over the signature of the administrator that the issuance of a variance will result in increased rates for base flood insurance coverage, and such construction increases risks to life and property.
 - e. I.D.N.R. All variances granted shall have the concurrence or approval of the Iowa Department of Natural Resources.

5. Hearings and Decisions of the Board of Adjustment.
- a. Hearings. Upon the filing with the board of adjustment of an appeal, an application for a conditional use or a request for a variance, the board shall hold a public hearing. The board shall fix a reasonable time for the hearing and give public notice thereof, as well as due notice to parties in interest. At the hearing, any party may appear in person or by agent or attorney and present written or oral evidence. The board may require the appellant or applicant to provide such information as is reasonably deemed necessary and may request the technical assistance and/or evaluation of a professional engineer or other expert person or agency, including the Iowa Department of Natural Resources.
 - b. Decisions. The board shall arrive at a decision on an appeal, conditional use or variance within a reasonable time. In passing upon an appeal, the board may, so long as such action is in conformity with the provisions of this code chapter, reverse or affirm, wholly or in part, or modify the order, requirement, decision, or determination appealed from, and it shall make its decision, in writing, setting forth the findings of fact and the reasons for its decision. In granting a conditional use or variance, the board shall consider such factors as contained in this section and all other relevant sections of this code chapter and may prescribe such conditions as contained in Section 102.9.03(5)(d).
 - c. Factors Upon Which the Decision of the Board Shall be Based. In passing upon applications for conditional uses or requests for variances, the board shall consider all relevant factors specified in other sections of this code chapter and:
 - (1) Encroachments. The danger to life and property due to increased flood heights or velocities caused by encroachments.
 - (2) Downstream. The danger that materials may be swept to other lands or downstream to the injury of others.
 - (3) Water/Sewer Systems. The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.
 - (4) Proposed Facility. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.
 - (5) Services. The importance of the services provided by the proposed facility to the community.
 - (6) Flood Plain Location. The requirements of the facility for a flood plain location.
 - (7) Alternative Locations. The availability of alternative locations not subject to flooding for the proposed use.
 - (8) Compatibility. The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.

- (9) City Plans. The relationship of the proposed use to comprehensive plan and flood plain management for the area.
 - (10) Emergency Vehicles. The safety of access to the property in times of flood for ordinary and emergency vehicles.
 - (11) Expectation. The expected heights, velocity, duration, rate of rise and sediment transport of the flood water expected at the site.
 - (12) Remainder. Such other factors which are relevant to the purpose of this code chapter.
- d. Conditions Attached to Conditional Uses or Variances. Upon consideration of the factors listed above, the board may attach such conditions to the granting of conditional uses or variances as it deems necessary to further the purpose of this code chapter. Such conditions may include, but not necessarily be limited to:
- (1) Modification. Modification of waste disposal and water supply facilities.
 - (2) Limitations. Limitation on periods of use and operation.
 - (3) Imposition. Imposition of operational controls, sureties, and deed restrictions.
 - (4) Construction. Requirements for construction of channel modification, dikes, levees, and other protective measures, provided such are approved by the Iowa Department of Natural Resources and are deemed the only practical alternative to achieving the purposes of this code chapter.
 - (5) Floodproofing Measures. Floodproofing measures shall be designed consistent with the flood protection elevation for the particular area, flood velocities, durations, rate of rise, hydrostatic and hydrodynamic forces, and other factors associated with the regulatory flood. The board of adjustment shall require that the applicant submit a plan or document certified by a registered professional engineer that the floodproofing elevation and associated flood factors for the particular area. Such floodproofing measures may include, but are not necessarily limited to the following:

 - i. Rupture. Construction to resist rupture or collapse caused by water pressure or floating debris.
 - j. Drains. Installation of valves or controls on sanitary and storm drains which will permit the drains to be closed to prevent backup of sewage and storm waters into the buildings or structures.
 - k. Electrical Equipment. Location of all electrical equipment, circuits and installed electrical appliances in a manner which will assure they are not subject to flooding.
- e. Appeals to the Court. Any person or persons, jointly or severally, aggrieved by any decision of the board of adjustment may present to a court of record a petition, duly verified, setting forth that such decision is illegal, in whole or in part, specifying the grounds of the illegality. Such petition shall be presented to the court within thirty days after the filing of the decision in the office of the board.

Upon a review conducted pursuant to Section 105.11.05 confirming that a violation, as described in Section 105.11.03, occurred, a notice of an Automated Traffic Citation will be mailed to the vehicle owner for each such violation recorded by the Automated Traffic Enforcement System. The Automatic Traffic Enforcement Contractor shall mail the notice within thirty (30) days after receiving information about the vehicle owner. The notice shall include the name and address of the vehicle owner; the vehicle make, if available and readily discernable; the vehicle registration number; the violation alleged; the time, date, and location of the alleged violation; the applicable fine; information for payment of the assessed fine; information as to the manner and form in which the Automated Traffic Citation may be challenged; and that the basis of the notice is a photographic or video record generated by the Automatic Traffic Enforcement System.

2. Any violation of subsection 105.11.03 (1) and 105.11.03 (2) above shall be subject to a civil fine of one hundred dollars (\$100).
3. Any violation of subsection 105.11.03 (3) above shall be subject to a civil fine as scheduled in the table below. The civil fine shall be doubled for any violation committed in a designated construction zone (as provided by the Code of Iowa).

105.11.07 Vehicle Owners Obligations Concerning an Automated Traffic Citation.

Within thirty (30) days from the date appearing at the top of a notice of Automated Traffic Citation sent to the Vehicle Owner, the Vehicle Owner shall either pay the fee associated with the citation or challenge the citation, in accordance with Section 105.11.08.

105.11.08 Contesting an Automated Traffic Citation.

A vehicle owner may contest an Automated Traffic Citation as follows:

1. Within thirty (30) days from the date appearing at the top of a notice of Automated Traffic Citation sent to the Vehicle Owner, the Vehicle Owner may either pay the fee associated with the citation or challenge the citation by submitting a written challenge to the citation. Any such written challenge or request must be on a form specified by and available from the City as indicated on the notice, and be sent to the City according to the instructions on that form. Upon receipt of a written challenge, a Waverly Police Officer shall determine whether the citation should be rescinded. Within thirty (30) days after the City receives such a challenge, the City shall notify the Vehicle Owner whether the challenge to the Automated Traffic Citation is successful, in which case, the citation shall be rescinded. Otherwise, the citation will stand. Thereafter, the City may seek voluntary payment and/or file the citation as a municipal infraction against the vehicle owner, in accordance with Section 105.11.09.
2. Within thirty (30) days from the date appearing at the top of a notice of Automated Traffic Citation, the Vehicle Owner may request a municipal infraction be filed pursuant to Iowa Code §364.22 in lieu of the options of payment and/or challenge listed in 105.11.08(1) above or after an unsuccessful challenge. Such a request must be filed prior to the due date of the initial fine or date set by the member of the Waverly Police Department following the written challenge detailed above in Subsection 105.11.08(1). Such a request will result in a court order requiring the Vehicle Owner to file an answer and appearance with the

Clerk of Court, as well as setting the matter for trial before a judge or magistrate. If the Court finds the Vehicle Owner guilty of the municipal infraction, mandated court costs will be added to the amount of the fine imposed by this ordinance.

105.11.09 Failure to Timely Pay or Challenge Automated Traffic Citation.

If the recipient of an Automated Traffic Citation does not either pay the fine by the due date on the original citation or successfully challenge the citation as provided herein, the City may file a municipal infraction against the Vehicle Owner in accordance with Waverly Code of Ordinances Chapter 23 and Section 364.22 of the Code of Iowa, seeking judgement for the applicable civil fine provided in Subsections 105.11.06(2) and 105.11.06(3) plus applicable state mandated filing fee and court costs. If judgement is entered for the City in the municipal infraction proceeding, the City may, subject to applicable law, pursue enforcement of the judgement together with interest as permitted by law. Collection of that judgement may include referral to the State of Iowa Income Offset Program administered by the Department of Administrative Services, State Accounting Enterprise. Notwithstanding the City's right to file a municipal infraction, the City may first seek voluntary payment of the fine by sending a written request for payment to the Vehicle Owner and/or referring the matter to a private service agent to conduct collection in accordance with all applicable law.

New construction means new buildings and structures and includes buildings and structures which are constructed as additions to existing buildings and structures.

New construction does not include reconstruction of an existing building or structure which does not constitute complete replacement of an existing building or structure or refitting of an existing building or structure, unless the reconstruction of an existing building or structure is required due to economic obsolescence and the reconstruction is necessary to implement recognized industry standards for the manufacturing and processing of specific products and the reconstruction is required for the owner of the building or structure to continue to competitively manufacture or process those products which determination shall receive prior approval from the city council upon the recommendation of the Iowa Development Commission.

The exemption shall also apply to new machinery and equipment assessed as real estate pursuant to Section 656427A.1, subsection (1), paragraph e of the 1979 Code of Iowa, as amended, unless the a of the normal replacement or the existing operational

Actual value added to industrial estate for the reasons specified is eligible to receive a partial exemption from taxation for a period of five years. "Actual value added" means the, actual value added as of the 1st of the year for which the exemption is received, except that actual value added by improvements to machinery and equipment means that actual value as determined by the assessor as of January 1st of each year for which the exemption is received. The amount of actual value added which is eligible to be exempt from taxation shall be as follows:

- A. For the 1st year, seventy-five percent
- B. For the 2nd year, sixty percent
- C. For the 3rd year, forty-five percent
- D. For the 4th year, thirty percent
- E. For the 5th year, fifteen percent.

However, granting of the exemption for new construction constituting complete replacement of an existing building or structure shall not result in the assessed value of the industrial real estate being reduced below the assessed value of industrial real estate before the start of the new construction added.

An application shall be filed for each project resulting in actual value for which an exemption is claimed. The application for exemption shall be filed by the owner of the property with the local assessor by February 1st of the assessment year in which the value added is 1st assessed for taxation. A person may submit a proposal to the city council to receive approval for eligibility for a tax exemption on new construction. The city council, by ordinance, may give its prior approval of a tax exemption for new construction if the new construction is in conformance with the zoning plans for the city. The prior approval shall also be subject to the hearing requirements of this ordinance. Such prior approval shall not entitle the owner to exemption from taxation until the new construction has been completed and found to be qualified real estate. However, if the tax exemption for new construction is not approved the person may submit an amended proposal to the city council to approve or reject.

When in the opinion of the city council continuation of the exemption granted in this ordinance ceases to be of benefit to the city, the council may repeal this ordinance, but all existing exemptions shall continue until their expiration.

A property tax exemption shall not be granted if the property for which the exemption is claimed has received any other property tax exemption authorized by law.
